QUESTION 11

Which are two valid scenarios related to vRealize Automation Extensibility Lifecycles? (Choose two.)

A. All properties must be specified.

B. In Extensibility Lifecycle, the virtual machine properties are passed to subscription workflows by default.

C. The current value will pass all properties.

D. Virtual machine properties are passed to subscription workflows by using the property Extensibility. Lifecycle Properties. VMPSMasterWorkflow32. BuildingMachine.

Correct Answer: CD

QUESTION 12

The catalog item RHELDBServer is currently associated to the service ProductionServers, which is an entitled service on the Infrastructure entitlement. There is an additional service named DevelopmentServers on the Lab entitlement. An administrator has been asked to expose RHELDBServer to the team on the Lab entitlement without providing access to the other items on the ProductionServers service.

How can this be accomplished without changing the items seen by the Infrastructure entitlement?

A. Add the ProductionServers service to the Lab entitlement.

B. Add the RHELDBServer item to the Lab entitlement.

C. Add RHELDBServer to the DevelopmentServers service.

D. Move RHELDBServer to the DevelopmentServers service.

Correct Answer: B
