Exam Name:Oracle Order Management Cloud 2018
Implementation Essentials

Version:Demo

QUESTION 1

A global Power Systems manufacturer sells Uninterrupted Power Supply (UPS) products through its online portal. To gain competitive advantage, the manufacturer wants to enhance the ability of buyers to select a desired configuration of the

high-end UPS models through guided selling options on its online selling portal. The company's product development team has finalized the enhancements and needs your help to get them implemented on their online selling portal that is supported by Oracle Cloud Configurator. (Choose four.)

What four actions would you take in Oracle Cloud Configurator to enhance a buyer's experience?

- A. You can display product reviews of customers who have purchased the same configuration earlier.
- B. You can create rules that will guide users in creating a valid model.
- C. You can allow buyers to raise requests if an expected product functionality is not offered.
- D. You can test the behavior of the configured model anytime when you are editing it.
- E. You can create enhancements to the model structure that supplements the imported configurable structure of a model item.
- F. You can enable a checkout option for a model when a valid configuration is finalized.
- G. You can create user interfaces that will be dynamically presented to users based on the options chosen in the Configurator model.

Correct Answer: BEDG

QUESTION 2

Which change mode takes a snapshot at the stages mentioned below: -When the orchestration process starts -When a change order is received at an orchestration process step

- A. Advanced
- B. Incremental
- C. None
- D. Simple

Correct Answer: A

QUESTION 3

Your company has a cost of change policy that charges a customer when the order is allocated, with no changes allowed after the goods are staged. Which fulfillment status will trigger compensation and impose charges on the customer when the sales order quantity is changed?

- A. Staged
- B. Backordered
- C. Released to Warehouse
- D. Ready to Release

Correct Answer: D

QUESTION 4

You are implementing the entire suite of Supply Chain Management Cloud for an auto component manufacturing and distribution company. This company has a manufacturing facility where different auto electrical components are produced

to fulfill the demand that originates from various customers. One of the components that the company sells to its customers requires specialized operations; therefore, the company outsources it to an external manufacturer instead of producing it in its own facility.

Which two steps are required to fulfill the demand for this component through outsourced manufacturing? (Choose two.)

- A. Select the Customer Sales Order Fulfillment check box under the Procurement offering.
- B. Create a sourcing rule of the Buy type for this component in the selling inventory organization.
- C. Define this component as an Item with the "Contract Manufacturing" field enabled and the "Make or Buy" attribute set to "Buy."
- D. Create a sourcing rule of the Make type for this component in the selling inventory organization. E. Model the manufacturer to which the component production is outsourced as a Supplier in the enterprise.
- E. Define this component as an Item with the "Contract Manufacturing" field enabled and the "Make or Buy" attribute set to "Make."

Correct Answer: A

QUESTION 5

Identify two valid use cases where a process assignment rule is defined to assign an orchestration process. (Choose two.)

- A. When you require one orchestration process for one fulfillment line
- B. When you require multiple orchestration processes for one fulfillment line
- C. When you require one orchestration process for multiple fulfillment lines
- D. When you require one orchestration process for sales order lines

Correct Answer: BC

QUESTION 6

Identify the sequence of Oracle Management Cloud components involved while processing a sales order.

- A. External Source Systems, Order Entry, Orchestration, External Interface Layer, Task Layer Services
- B. External Source Systems, Internal Systems, Orchestration, Task Layer Services, External Interface Layer Internal Systems
- C. External Source Systems, Order Entry, Orchestration, Task Layer Services, External Interface Layer
- D. Order Entry, Orchestration, Task Layer Services, External Interface Layer

Correct Answer: D

QUESTION 7

In the Cloud Order Management system, identify the function performed by the External Interface Layer.

- A. It receives information from upstream order capture systems, sends information to downstream fulfillment systems, and interprets, responses and updates from those systems.
- B. It sends information to downstream fulfillment systems, and interprets responses and updates from those systems.
- C. It imports orders and processes them to fulfillment lines before assigning them to fulfillment systems.
- D. It manages the communication between Order Management and external or internal fulfillment systems.

Correct Answer: B

QUESTION 8

Your company wants to default the preferred fulfillment warehouse and scheduled ship date as order requested date during order import and skip the scheduling task for a particular order type. What are the two business rules that must be configured to achieve this requirement? (Choose two.)

- A. Define a lead time expression rule.
- B. Define a compensation pattern rule.
- C. Define a branching condition rule.
- D. Define a line selection criteria rule for the scheduling task.
- E. Define a pre-transformation defaulting rule.

Correct Answer: CD

QUESTION 9

What action must be performed on the orchestration process user interface to activate an orchestration process after the order orchestration configurations are completed?

- A. Validate the orchestration process.
- B. Release and deploy the orchestration process.
- C. Download the generated orchestration process.
- D. Release the orchestration process.

Correct Answer: B

QUESTION 10

Your customer wants to use Oracle Integration Cloud Service with Order Management to communicate business events. Select the option that shows the correct order in which the steps should be executed.

- A. Manage business event trigger points, create an integration, create a connection, and track business events.
- B. You cannot use Oracle Integration Cloud service with Order Management to communicate business events.
- C. Create an integration, create a connection, and track business events.
- D. Manage business event trigger points, create a connection, create an integration, track business events.
- E. Track business events, manage business event trigger points, and create an integration.

Correct Answer: A
