Foundations Associate

Version:Demo

QUESTION 1

What is the Oracle recommended way to upgrade databases?

- A. Database Upgrade Assistant (DBUA)
- B. Data Pump Export/Import
- C. Command Line Upgrade
- D. AutoUpgrade

Correct Answer: D

QUESTION 2

Which statement is true about moving virtual machine (VM) database (DB) systems from one compartment to another?

- A. You can move VM DB systems from one compartment to another by only using Oracle Cloud Infrastructure REST APIs.
- B. You do not need access permissions to the compartment that the resource is being moved to when moving VM DB systems to a different compartment.
- C. You have to move dependent resources like Database Homes and databases to the destination compartment before moving the VM DB system.
- D. You can move DB systems to a different compartment if you have sufficient access permissions to the compartment that the resource is being moved to, as well as the current compartment.

Correct Answer: D

QUESTION 3

Which Lakehouse service should you use for serverless Spark processing?

- A. OCI Data Flow
- B. Oracle Analytics Cloud
- C. OCI Object Storage
- D. OCI Data Catalog

Correct Answer: A

QUESTION 4

What information is required to connect to the NoSQL Database Cloud Service?

- A. API signing key, admin ID, user ID
- B. signing key fingerprint, API signing key, tenancy OCID
- C. user ID, tenancy ID, component ID
- D. tenancy ID, passphrase, handshake key

Correct Answer: B

QUESTION 5

Which two target database environments provide both high availability (HA) and disaster re-recovery (DR) options in the cloud? (Choose all correct answers)

- A. Streaming Service
- B. Compute VM
- C. Exadata Cloud Service
- D. Autonomous Database

Correct Answer: CD

QUESTION 6

In order to support multicloud strategies, what is offered as an industry first by Oracle?

- A. Private and public cloud network
- B. Oracle FastConnect
- C. Dedicated cloud region
- D. Cloud databases

Correct Answer: B

QUESTION 7

Which service is used by default by the MySQL Database Service to store user data to make it more resistant to failures?

- A. OCI Object Storage
- B. OCI File Storage
- C. OCI Block Volumes
- D. OCI Data Safe

Correct Answer: C

QUESTION 8

Which workload CANNOT be run on Oracle Database 19c?

- A. Machine Learning
- B. Translytical
- C. Gaming
- D. Hadoop Clusters

Correct Answer: D

QUESTION 9

Where should you store unstructured, high volume data sets of unknown value for best price/performance?

- A. OCI Data Flow
- B. OCI Object Storage
- C. OCI Data Catalog
- D. OCI GoldenGate

Correct Answer: C

QUESTION 10

Which two are objectives of Oracle's Data Management strategy? (Choose all correct answers)

- A. Offer multiple integration points for 3rd party databases that work better for mixed and analytic workloads.
- B. Automate everything for developers, data analysts, DBAs and data scientists.
- C. Provide for the fastest, most scalable converged SQL database.
- D. Provide the best platform for warehouse workloads only.

Correct Answer: AB

QUESTION 11

What are two characteristics of Oracle SQLcl (SQL Developer Command Line)? (Choose all correct answers)

- A. Tracks database schema changes

- B. Creates isolated development environments
- C. Available in the OCI Cloud Shell by default
- D. Ability to execute SQL batch files

Correct Answer: AD

QUESTION 12

The Oracle Cloud Infrastructure (OCI) Data Catalog is an integral part of the Lakehouse solution. What level of data detail does Data Catalog provide when integrated with Autonomous Databases and Object storage?

- A. View of data for discovery
- B. Data Warehouse
- C. Source of managed services
- D. Analytic environments

Correct Answer: A
