Exam Name: Avaya Agile Communication
Environment(TM) Implementation Exam

Version: Demo

QUESTION 1

A customer plans to deploy an Avaya ACETM Application Integration Engine (AIE) version 3.2. As part of the definition of the project scope of work, the technician wants to ensure the appropriate operating system is installed on the host server.

Which software operating systems (OS) is supported?

- A. 32-bit or 64-bit Windows 2003 OS
- B. 32-bit or 64-bit Windows 2008 OS
- C. 32-bit Windows 2003 OS or 64-bit Windows 2008 R2 OS
- D. 64-bit Windows 2008 OS only

Correct Answer: C

QUESTION 2

A global bank has an Avaya High Availability (HA) ACETM system installed, and wants to deploy the Hot Decking application. The customer wants to ensure high availability and reliability for application users.

Which additional hardware and operating system is required beyond the Avaya HA ACETM base to support the solution?

- A. One additional Linux server for the Avaya ACETM base and two Linux or Windows servers to host the Application Integration Engine (AIE) software.
- B. Two additional Linux servers for the Avaya ACETM base and two Linux or Windows servers to host the AIE software.
- C. Two Windows servers to host the AIE software.
- D. No additional hardware, the Avaya ACETM and AIE software will co-reside on the same server.

Correct Answer: C

QUESTION 3

A technician is deploying a Microsoft Desktop Enablement (Web Browser and Office Add-ins) solution and has used the Avaya ACETM Configuration interface to build the add-in install packages for the end users.

Which action should be taken to verify the Avaya ACETM configuration is valid?

- A. Using the Avaya ACETM GUI, ensure OfficeAddinEnabled and BrowserAddingEnabled user groups are present in the list of Avaya ACETM user groups.
- B. Using the WebSphere Administrative Console, ensure the OfficeAddinEnabled and BrowserAddingEnabled services are started.
- C. Using the Windows server console, run the Addin_service_control.bat file and ensure the OfficeAddinEnabled and BrowserAddingEnabled services are started.
- D. Using the Application Integration Engine (AIE) GUI Status window, ensure the OfficeAddinEnabled and BrowserAddingEnabled services are started.

Correct Answer: A

QUESTION 4

A customer is deploying an Avaya ACETM on Windows for a standalone configuration. They are also deploying Corporate Portal and Message Drop and Blast services. The network includes a SIP-enabled communication system and 500 end users. How many Avaya ACETM base software licenses are required?

- A. 1
- B. 2
- C. 3
- D. 500

Correct Answer: C

QUESTION 5

A customer has geographically diverse sites and plans to deploy an Avaya ACETM Federation. Their network includes a Communication Server 1000 (CS1000) system running a supported software release, IBM Lotus Sametime, and the associated end-user telephones and clients. When planning the Federation architecture, which is the platform consideration?

- A. An Avaya ACETM Federation requires an AvayaACETMHigh Availability (HA) configuration.
- B. An AvayaACETMFederation requires an AvayaACETMLinux-based hardware platform.
- C. An Avaya ACETM Federation requires a Microsoft Office Communications Server (OCS) serviceprovider.
- D. An Avaya ACETM Federation requires an Application Integration Engine (AIE) server.

Correct Answer: A

QUESTION 6

A technician has completed the installation and configuration of an Avaya ACETM and IBM Lotus Sametime for an integration solution. The solution includes telephony client presence. Which action should be taken to ensure the deployment was successful?

- A. Log into the Sametime server and ensure the telephony presence plug-in has been added to the site.xml file.
- B. Log into the Sametime Domino server and ensure the telephony presence plug-in has been added to the TCSP configuration file.
- C. Log into the Avaya ACETM GUI and ensure contact information for the Sametime Connect client has been automatically populated by Avaya ACETM.
- D. Log into the Sametime Connect client and ensure that a telephony presence icon appears for the Sametime Connect client users who are configured for telephony presence information in Avaya ACETM.

Correct Answer: D

QUESTION 7

A technician is installing the Application Integration Engine (AIE) software in active directory mode for a standalone solution, the AIE software will be installed on a supported server with a supported Windows 2008 operating system. Which statement describes an installation prerequisite?

- A. An existing version Apache Tomcat is running.
- B. An existing version of Java Runtime Environment (JRE) is running.
- C. The Windows server is configured with the role of DHCP Server.
- D. The Windows server is configured with the role of Web Server.

Correct Answer: D

QUESTION 8

A mid-size enterprise is deploying an Avaya ACETM IBM Lotus Sametime Integration solution. The customer network includes IBM Lotus Sametime, IBM Lotus Notes, and a communication Server 1000 system and end-user telephones and clients.

A technician has a work order to install the Avaya ACETM Technology Conferencing Service Provider Interface (TCSPI) on the Sametime server as part of the UC deployment. Where can a copy of the latest version of the Avaya ACETM TCSPI be obtained?

- A. from the Avaya ACETM GUI Help menu
- B. from the IBM Lotus Sametime server
- C. from the Domino server
- D. from the IBM Lotus Notes catalog

Correct Answer: C

QUESTION 9

An existing Avaya ACETM customer wants a solution that will work with its existing customer resource management (CRM) system to notify customers proactively about promotions or offers relevant to their individual needs. The customer has an Avaya ACETM on Windows core solution and does not want to deploy additional hardware. Which Avaya ACETM solution matches the key capabilities that the customer requires?

- A. Hot Desking
- B. EventResponse Manager
- C. Message Drop and Blast
- D. WebBrowser and Office Add-ins.

Correct Answer: D

QUESTION 10

A technician is verifying an Avaya ACETM Hot Desking deployment. Avaya ACETM and the Application Integration Engine (AIE) are installed, configured, and fully operational.

An Avaya ACETM administrator previously configured a user ID and password for the Hotdesk Virtual Secretary User ID in the Avaya ACETM GUI. The Hot Desking application configuration has been completed in the AIE GUI.

Which action should be taken to verify that the variable entered for the Hotdesk Virtual Secretary User ID in the AIE GUI is correct?

- A. Using the Avaya ACETM GUI, search for and list the user ID for the Hotdesk virtual secretary. Ensure the Avaya ACETM user ID matches the variable entered for the Hotdesk Virtual Secretary User ID.
- B. Using the AIE User Synchronization tool, generate a report of valid user IDs. Ensure the variable entered for the Hotdesk Virtual Secretary User ID is listed in the synchronization report.
- C. Using the Windows server console, retrieve the local users. Ensure the variable entered for the Hotdesk Virtual Secretary user ID displays in the list of local Windows user.
- D. Ensure the variable entered for the Hotdesk Virtual Secretary User ID in the AIE GUI has automatically populated during the AIE installation.

Correct Answer: A

QUESTION 11

A technician has installed an Avaya ACETM on Linux base software for a standalone configuration with a root user id of nowUcMe! a WAS admin password nowUdnT, and a MySQL root password nverlA8. When logging into the Avaya ACETM GUI for the first time, what is the default admin user ID password?

- A. nverlA8
- B. nowUdnT
- C. agile
- D. nowUcMe!

Correct Answer: C

QUESTION 12

Which statement describes the purpose of the IBM WebSphere Application Server?

- A. It provides the environment to run web-enabled e-business applications.
- B. It stores web user profile data and call session information.
- C. It delivers a telephony presence and messaging services to web clients.
- D. It provides the interface for SIP communications.

Correct Answer: A

QUESTION 13

A technician is installing Avaya ACETM Microsoft Communicator Add-in as part of a customer's Microsoft Lync Integration solution. All required network element integration tasks are complete. The technician has locally deployed the software on a customer's desktop and is ready to install the add-in. What is the next step to install the Avaya ACPTM Microsoft Communicator Add-in?

- A. Launch the Installation by double-clicking on theDCE.configurator.msi file
- B. Launch the Avaya ACE Configurator to configure the settings Avaya ACETM Microsoft CommunicatorAdd-in
- C. Launch the installation by double-clicking onLyncSdkRedist-4.0.7577.124.msi file
- D. Launch the installation by double-clicking on LyncIntegration-<release#>.msi file

Correct Answer: A

QUESTION 14

A customer requires secure-only communication with Avaya ACETM. Which statement describes a supported method to meet the customer requirements?

- A. Disable the root account.
- B. Change the Avaya ACETM OAMP admin password.
- C. Disable the unsecured port for event notification channel on the Avaya ACETM host.
- D. Disable the secured port for secure event notification channel on the AvayaACETMhost.

Correct Answer: C

QUESTION 15

A technician is installing Avaya ACETM base software on a supported Linux server for a High Availability (HA) configuration. Which statement matches the first step in the installation process?

- A. Login to the Linux Server that will be used for AvayaACETMas HostA using the root user ID.
- B. Insert the IBM WebSphere disk into the drive.
- C. Enter the WebSphere primary administrative account password.
- D. Run the installation tool.

Correct Answer: A

QUESTION 16

In which mode must Application Integration Engine (AIE) be installed to support Web Browser and Office Add-ins?

- A. IWA mode
- B. HA mode
- C. Clustered mode
- D. Non-IWA mode

Correct Answer: A

QUESTION 17

A technician logs into an Avaya ACETM system to select the IP address for the ACETM system. Under the General tab, the technician navigates to the ACETM Core Information section to determine if this system can support High Availability. Which Avaya ACETM RIs 3.0 Core installation type supports High Availability?

- A. Standalone and System Platform
- B. System Platform only
- C. Standalone only
- D. Windows2008R2Server

Correct Answer: B
