- A. 8000 APs 5 WCS instances
- B. 8000 APs 10 WCS instances
- C. 18000 APs 5 WCS instances
- D. 18000 APs 10 WCS instances

Correct Answer: B

QUESTION 8

What is the purpose of network design synchronization between Cisco WCS v7.0 and the Cisco 3300 Series MSE?

- A. update client and map information
- B. update controller and AP information
- C. update map and AP information
- D. update controller and map information

Correct Answer: C

QUESTION 9

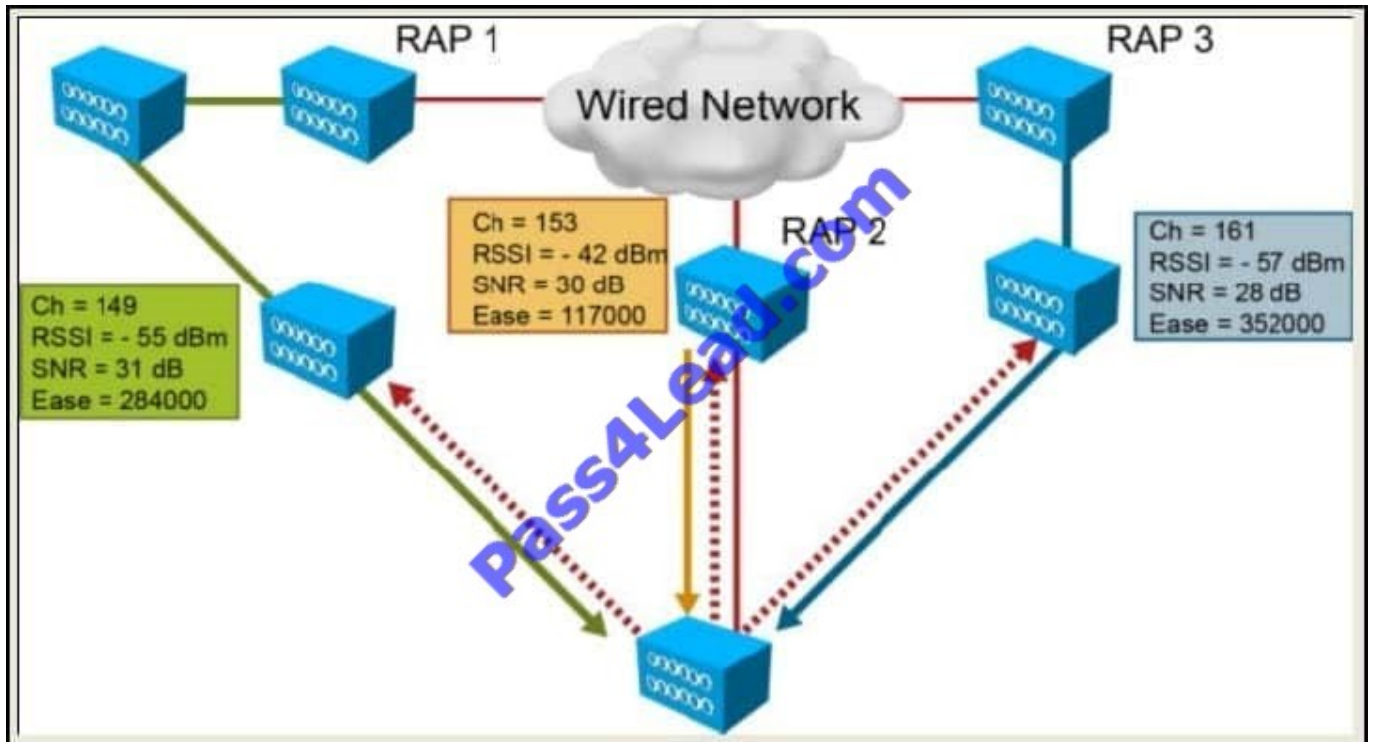

What are the recommended RFID timeout configuration values for Cisco WLC v7.0 to ensure that tags are detected?

- A. minimum of two times and maximum of four times the shortest tag interval that is found in the RFID population
- B. minimum of two times and maximum of four times the longest tag interval that is found in the RFID population
- C. minimum of three times and maximum of eight times the shortest tag interval that is found in the RFID population
- D. minimum of three times and maximum of eight times the longest tag interval that is found in the RFID population
- E. minimum of 6 times and maximum of 12 times the shortest tag interval that is found in the RFID population
- F. minimum of 6 times and maximum of 12 times the longest tag interval that is found in the RFID population

Correct Answer: D

QUESTION 10

Refer to the exhibit.

Which direction and resulting RAP is selected by the bottom MAP?

- A. RAP 1
- B. RAP 2
- C. RAP 3

Correct Answer: C

QUESTION 11

Which two statements describe the difference between a Cisco WGB and a universal WGB in a wireless network? (Choose two.)

- A. Universal WGB associates with its own MAC address on behalf of its wired clients.
- B. Cisco WGB associates with its own MAC address on behalf of its wired clients.
- C. Universal WGB associates using one of the wired client MAC addresses.
- D. Cisco WGB associates using one of the wired client MAC addresses.

Correct Answer: BC

QUESTION 12

An engineer discovers four templates from a production controller, then redeploys those templates to twelve other

controllers. On two of those controllers, the template application is failing. What is the cause of the failure?

- A. The applied controllers code versions do not match that of the controller used to discover the templates.
- B. The templates are duplicates of existing templates on the controllers.
- C. Templates can only be deployed to ten controllers at a time.
- D. The two failing controllers were manually configured previously and must have templates discovered before applying new templates.

Correct Answer: B
