Collaboration Applications Integration Exam

Version:Demo

QUESTION 1

Which two functions are performed by the Session Border Controller for Enterprise (SBCE) when interacting with WebRTC clients from the Public Internet? (Choose two.)

- A. Convert WebRTC signaling into SIP Signaling and pass direct to Session Manager (SM)
- B. Convert the WebRTC media to traditional VOIP SIP media
- C. A configured TURN server relays WebRTC media from the web browser through to a Media Server
- D. A configured Reverse Proxy sends WebRTC signaling from the Web browser through to the Avaya Aura® Web Gateway (AAWG)
- E. Relay SIP messages sent from Web browser through to Session Manager (SM)

Correct Answer: CD

QUESTION 2

In which two ways can you deploy the Avaya Equinox™ solution at a customer premise? (Choose two.)

- A. SIP Deployment Only
- B. Team Engagement Deployment
- C. Video-Only Deployment
- D. Over-The-Top Deployment
- E. Audio-Only Deployment

Correct Answer: BD

QUESTION 3

An Avaya Equinox™ Streaming and Recording (AESR) deployment can scale to a maximum of how many users?

- A. 100,000
- B. 16,000
- C. 10,000
- D. 5000

Correct Answer: A

QUESTION 4

Which two deployment models are available for Avaya Equinox™ Solution? (Choose two.)

- A. Turnkey only
- B. Software only
- C. On Windows
- D. Over The Top
- E. Team Engagement

Correct Answer: DE

QUESTION 5

The Avaya Equinox™ Streaming and Recording (AESR) consists of which three components? (Choose three.)

- A. Virtual Delivery Mode
- B. Delivery Mode
- C. Conference Point
- D. Load balancer
- E. Optimizer

Correct Answer: ABC

QUESTION 6

Which three functions are functions of the Equinox Management Server? (Choose three.)

- A. SIP Proxy for Equinox Clients Registration
- B. Auto-Configuration server for Equinox Clients
- C. Resources and bandwidth management
- D. Video network device management
- E. Equinox Solution Meeting management

Correct Answer: CDE

QUESTION 7

Which Avaya Equinox™ solution component provides the Equinox Client with configuration data?

- A. Avaya Aura® Session Manager

- B. Avaya Aura® Web Gateway
- C. Avaya Aura® System Manager
- D. Avaya Aura® Device Services

Correct Answer: C

QUESTION 8

Which type of Licensing Mechanism is used by Avaya Multimedia Messaging (AMM)?

- A. A license activation code is directly typed into the AMM management console.
- B. AMM is pointed to the hat WebLM Server where the License file is installed
- C. A license is not required other than accepting the EULA
- D. AMM license file is installed locally on AMM Server on local WebLM server

Correct Answer: A

QUESTION 9

How does Avaya Multimedia Messaging communicate with Equinox clients?

- A. Using HTTPS via Session Manager
- B. Directly using HTTPS
- C. Directly using SIP Protocol
- D. Using SIP via Session Manager

Correct Answer: A

QUESTION 10

In which three ways can you configure an Equinox Client using AADS Automatic Configuration Method? (Choose three.)

- A. Manual Configuration
- B. Using the DHCP script
- C. Using an e-mail account
- D. Using a Web Address
- E. Using Desktop Script

Correct Answer: ACD

QUESTION 11

It is possible to download the same client configuration to an Avaya Equinox™ client when it is connected via the Public Internet (3G/4G) or when it is connected via a corporate Wi-Fi hotspot.

What statement below described the recommended technique used to do this?

- A. The Avaya Aura® Device Services (AADS) returns the configured list of all Public and Private IP addresses that the client should attempt to connect to.
- B. The client must be statically provisioned with the ordered list of server IP addresses that it should attempt to connect to (both private and public).
- C. Split horizon DNS mapping is configured in Avaya Aura® Device Services (AADS) to return FQDNs rather than IP addresses; the client resolves the FQDN to correct server address by DNS or local hosts file.
- D. The client automatically selects a different Avaya Aura® Device Services (AADS) profile when connected to a Public Internet Service Provider (ISP) based on an IP address subnet mapping table downloaded by Avaya Aura® Device Services (AADS).

Correct Answer: C

QUESTION 12

If an Avaya Equinox™ for Web client is used to access an Avaya Equinox™ Conferencing Virtual Meeting Room from the public Internet, which three statements are correct? (Choose three.)

- A. The media is anchored on an Avaya Equinox™ Conferencing Media Server via Session Border Controller for Enterprise (SBCE).
- B. The WebRTC media is anchored on the Avaya Aura Media Server (AAMS).
- C. A web browser is used to access the User Portal on the Avaya Aura® Web Gateway (AAWG) via the Session Border Controller for Enterprise (SBCE).
- D. SIP Signaling is sent from Avaya Aura® Web Gateway (AAWG) to the SIP B2BUA on Avaya Equinox™ Management Server.
- E. SIP Signaling is sent from Avaya Aura® Web Gateway (AAWG) to Communication Manager (CM).

Correct Answer: CDE
