Exam Code:74-324

Exam Name:Administering Office 365 for Small
Businesses

Version:Demo

QUESTION 1

You need to set policy filters that will be triggered by the IP address or FQDN of an inbound or outbound server. Which tool should you use?

- A. Microsoft Exchange Control Panel
- B. Microsoft Online Services Directory Synchronization Configuration Wizard
- C. Forefront Online Protection for Exchange Administration Center
- D. Office 365 Portal

Correct Answer: C

QUESTION 2

Your company has an intranet site that is hosted on Microsoft SharePoint Online. Five users create subsites. None of the subsites inherit the permissions of the parent site. You need to ensure that a specific user can administer all the intranet subsites. You must accomplish this goal by using the minimum amount of effort. What should you do?

- A. Assign the user the Full Control permission to the root site.
- B. Add the user to the Office 365 Service Support Admin role group.
- C. Add the user to the Owners group of the root site.
- D. Add the user to the Office 365 User Account Admin role group.
- E. Add the user to the Site Collection Administrators group.
- F. Add the user to the Office 365 Help Desk Admin role group.

Correct Answer: E

QUESTION 3

Your company uses Office 365. You need to prevent users from initiating remote wipes of mobile devices by using the Office 365 Portal. What should you modify?

- A. The Exchange ActiveSync device policy
- B. The default role assignment policy
- C. The Exchange ActiveSync Access settings
- D. The Outlook Web App mailbox policy

Correct Answer: D

QUESTION 6

Your company has an Office 365 E3 Plan subscription with 60 licenses. You import and license all 60 users in your Office 365 directory. How much Microsoft SharePoint Online storage space does the subscription provide?

- A. 30 GB
- B. 40 GB
- C. 60 GB
- D. 70 GB

Correct Answer: B

QUESTION 7

Your company has a main office and a branch office. Both offices are connected directly to the Internet. The branch office Internet connection has limited bandwidth. The company deploys Microsoft Lync Online. You need to ensure that branch office users can use only the instant messaging feature of Lync Online and cannot connect to audio or video conferences. What should you do?

- A. From the Office 365 Portal, modify the user properties of each branch office user.
- B. From the Office 365 Portal, configure the license settings of each branch office user.
- C. On the branch office firewall, block all outbound traffic on port 5061.
- D. Deploy only the Microsoft Lync 2010 Attendee client to the branch office users.

Correct Answer: A

QUESTION 8

Your company has an Office 365 subscription. You need to assign the minimum permissions necessary to ensure that an Office 365 administrator can assign a user to the Billing Admin role. To which role or role group should you assign the administrator?

- A. Billing administrator
- B. Password Administrator
- C. User Management Administrator
- D. Service Administrator
- E. Agent Help Desk Admin (Partner Delegate "Limited Administration")
- F. Global administrator

Correct Answer: F

QUESTION 9

Which two statements about Office 365 Help Desk Administrators are true? (Each correct answer presents a complete solution. Choose two.)

- A. Help Desk Administrators cannot make changes to Global Administrator accounts.
- B. Help Desk Administrators can reset User Management Administrator account passwords.
- C. Help Desk Administrators can reset only user passwords.
- D. Help Desk Administrators can reset Billing Administrator account passwords.

Correct Answer: AC

QUESTION 10

Your company has an Office 365 E3 subscription. An Office 365 user can no longer save Microsoft Word documents or Microsoft Excel workbooks. You ascertain that Word and Excel are in read-only mode. You need to ensure that the user can save Word and Excel documents.

What should you do?

- A. On the user's computer, uninstall and reinstall Microsoft Office.
- B. On the user's computer, install the Desktop Set-Up Assistant.
- C. Purchase an E4 license and assign it to the user.
- D. In the Office 365 Portal, disable and re-enable the user's Office 365 license.

Correct Answer: B

QUESTION 11

Your company has an Office 365 subscription for midsize businesses and enterprises. An Office 365 user can only view Microsoft Word documents stored in a Microsoft SharePoint Online document library while working in Windows Internet

Explorer. You need to ensure that the user can edit the Word documents.

What should you do?

- A. Install the latest version of Microsoft Office on the user's computer.
- B. Run the Office 365 Sign-in Assistant on the user's computer.
- C. Assign an Office 365 E3 license to the user.
- D. Assign an Office 365 E1 license to the user.

Correct Answer: C

QUESTION 12

You administer Office 365 from a computer that runs Windows 7 Professional with Windows PowerShell and the .NET Framework 3.5.1 enabled. You need to establish a remote Windows PowerShell connection from your computer to the Microsoft Exchange Online service. Which three Windows PowerShell cmdlets should you run? (Each correct answer presents part of the solution. Choose three.)

A. `$LiveCred = Set-Credential`

B. `Execute-PSSession $Session`

C. `Import PSSession SSession`

D. `$LiveCred = Get-Credential`

E. `$Session = New-PSSession -ConfigurationName Microsoft.Exchange -ConnectionUri https://ps.outlook.com/powershell/ -Credential $LiveCred -Authentication Basic -AllowRedirection`

Correct Answer: CDE
