Vendor: Microsoft

Exam Code:98-365

Exam Name: Windows Server Administration Fundamentals

Version: Demo

QUESTION 1

You need to ensure that Active Directory can be recovered in case of a server failure. Your backup must include the:

A. Shared drives

B. Page File

C. System State

D. Computer name

Correct Answer: C

The System State data includes Active Directory and all other system components and services on which Active Directory is dependent.

QUESTION 2

Which of the following statements are true about Resmon? Each correct answer represents a complete solution. Choose all that apply.

A. It is used for parental control and filtering, and controls which Web sites can be visited and which programs can have Internet access.

B. It is a system monitoring tool.

C. It enables users to view and monitor complete resource information about their computer.

D. It is a lightweight utility for local host monitoring that is queried by tools like nagios over http.

Correct Answer: BCD

Resmon is a system monitoring tool. It is a lightweight utility for local host monitoring that is queried by tools like nagios over http. It enables users to view and monitor complete resource information about their computer, similar to some of the features found in Task Manager.

A: There are several third-party appications that can be used for parental control and filtering, and control which Web sites can be visited and which programs can have Internet access. They can block sites that fall into specific categories, such as pornography, violence, etc. Certain newsgroups can also be blocked if they are not included in the database of child-safe groups. However, Resmon is not a parental control and filtering application.

QUESTION 3

Which storage technology supports speeds up to 16 Gbps?

A. Network File System (NFS)

B. Fibre Channel (FC)

C. Serial Advanced Technology Attachment (SATA)

D. Small Computer System Interface (SCSI)

Correct Answer: B

QUESTION 7

This question requires that you evaluate the underlined text to determine if it is correct.

The default security permission assigned to Everyone when a new share is created is "change".

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

A. Read

B. Full control

C. None

D. No change is needed.

Correct Answer: A

Read is the default permission.

QUESTION 8

You manage the servers for the School of Business at your university. The school has a Hyper-V server that runs three virtual machines (VMs). Each VM runs Windows Server 2016.

You need to apply the latest Windows server updates to each of the VMs. You need to be able to revert the servers back to their original state before applying the updates.

Which Microsoft Virtualization feature should you use?

A. Live Migration

B. Checkpoints

C. VHD Virtual Hard Disks

D. Failover Cluster

Correct Answer: B

Checkpoints (formerly called snapshots) provide a fast and easy way to revert the virtual machine to a previous state.

QUESTION 9

You purchase a device from an online retailer and install it in a computer running Windows Server 2016. You are having intermittent problems and want to look for an updated driver.

You attempt to update the driver through Device Manager, but the utility is unable to find an updated driver.

Where should you look next?

A. Microsoft Windows Download Center

B. online retailer technical support

C. Windows installation software disk

D. the device manufacturer website

Correct Answer: A

QUESTION 10

The manager at the coffee house where you work asks for advice on adding storage to the store\\'s server to perform backups.

The additional storage must meet the following requirements:

Hold at least 600 GB Be reasonably priced Be reasonably fast

Which solution should you recommend?

A. USB hard drive

B. USB flash drive

C. SCSI tape backup system

D. External SCSI hard drive

Correct Answer: A

USB hard drives have higher capacity than USB flash drives.

USB hard drives are faster and cheaper than a SCSI tape backup system.

USB hard drives are cheaper than external SCSI hard drives.

QUESTION 11

You are monitoring a server running Windows Server 2016.

What should you use to view detailed current performance information and server resources used?

A. Task Manager

B. Performance Monitor

C. Server Manager

D. Event Viewer

Correct Answer: B

QUESTION 12

What type of driver is tested and includes a digital certificate?

A. published

B. certified

C. compliant

D. signed

Correct Answer: D

A signed device driver includes a digital signature, which is an electronic security mark that can indicate the software publisher and information that can show whether a driver has been altered. When Microsoft signs it, the driver has been thoroughly tested to ensure that it will not cause problems with the system\\'s reliability or cause a security problem.
