- B. Marcel must enter this URL in a browser:
`http://[HOST]:[PORT]/wps/wcm/connect/?MOD=VersioningEnablement`
- C. An administrator must modify the `wpconfig.properties` file and add the following line:
`WcmVersioning=true`

D. Marcel must enter this URL in a browser:`http://[HOST]:[PORT]/wps/wcm/connect/?MOD=AJPEResourceChecker&fix=true`

Answer: A

Question No : 4

Eve is the Public Relations Manager for AT Corporation. She needs to post a new Event content object to their website. At some point in the future, the Event must be removed from the live website, however it should not be deleted from the repository. Who can accomplish this task, and how can the task be accomplished?

- A. An editor can click the Restart Workflow button.
- B. An approver can click the Restart Workflow button.
- C. An editor can click the Next Stage button to move the document to the next stage in the Workflow. The next stage would need to have an Expire action.
- D. An approver can click the Next Stage button to move the document to the next stage in the Workflow. The next stage would need to have an Expire action.

Answer: D

Question No : 5

Kellan is a content creator. He is creating Job Posting content items. The content items should only be published on the live website until the end of the current month. Kellan specifies an expiry date on the content items for the end of the current month. What also must be done to ensure that the content is removed from the live website on that date?

- A. An administrator must delete the content item from the library on that date.
- B. The expiry date must be set in a Date Component that should be added to the content item.
- C. The content item's selected workflow must include an expire action.
- D. Specify the expiry date in the `icm.properties` file.

Answer: C

Explanation:

QUESTIONNO: 6

Christine is a content creator. She has created a content item that has had many modifications made to it after it was published. She would like to view the modifications that she made to the content item last month. How can she accomplish this task?

- A. Restore the content library to a previous version.
- B. Open the content item in Edit mode. Click the Version button, select the version, and click the Preview button.
- C. Create a draft of the content item and select which version to publish. Then,click the Preview button to view the content's details.
- D. Open the content item in Read mode. Click the Version button, select the version, and click the Preview button.

Answer: D

Question No : 6

Dan is a content creator responsible for adding press release content to his company's website. All his content goes through the PR Workflow. Today he is creating a special press release that needs to be seen by several groups that are not normally given access using the PR Workflow. How can Dan resolve this problem without contacting a developer?

- A. Dan cannot resolve this on his own. Dan needs to contact the developer and have him modify the PR Workflow.
- B. From any content view, click More Actions / Update Readers. Dan then adds the appropriate groups to thecontent from the Update Readers page.
- C. When creating the content, Dan should click the Read button in the System Defined area of the Access section. Dan then adds the appropriate groups to this section.
- D. When creating the content, Dan should click theSelect Additional Viewers button and add the appropriate groups. The group is able to read the content item after it is published.

Answer: D

Question No : 7

John is an author creating content for the ABC Corporation. After creating the content, he is

trying to preview and verify how the content shows in the website rendered from the same server. But when previewed, the content is rendered in a new web page without the portal themes and skins. What must he do to preview in a portal page?

- A.** To allow users to preview content in portal pages, John must select specific portal pages from the list located under Allow authors to preview content in the local portal pages selected in Previewing Options for Authoring portlet. He must also enter the URL to the page in the local portal server in the Allow authors to preview content using the following URLs section.
- B.** To allow users to preview content in portal pages, John must select specific portal pages from the list located under Allow authors to preview content in the local portal pages selected in Previewing Options for Authoring portlet. The selected pages must contain a web content viewer to display the content.
- C.** You cannot preview the content as a portal page when authoring content. You must add the content to the actual page with web content viewer and then directly access the page as a regular user and then verify the display.
- D.** John must be a Administrator to preview the content in a portal page.

Answer: B

Question No : 8

Ted has created an HTML component that references an Image component. He wants to change the image but needs to check that the image is not being used anywhere else. What is the best way for him to achieve this outcome?

- A.** Use the Advanced Search capability in Lotus Web Content Management to look for the component name in any other components.
- B.** Change the image and check the site to see if any other pages have been affected.
- C.** Open the Image component and then use the View References -> Show references from item. This action shows where the image is being used
- D.** Open the Image component and then use the View References -> Show references to item. This action shows where the image is being used.

Answer: D

Question No : 9

- A content element (Body)
- A navigator (SiteNav)
- The company's corporatologo (CorpLogo), which is an Image component in the Component library

Which one of the following answers best describes how she can accomplish this task?

- A. `[element type="content" context="current" key="Body"/]`
`

`
`[component name="SiteNav"/]`
`

`
`[element name="CorpLogo"/]`
- B. `[element type="content" context="current" key="Body"/]`
`

`
`[element name="SiteNav"/]`
`

`
`[element name="CorpLogo"/]`

C. [element type="content" context="current" key="Body"]

[component name="SiteNav"]

[component name="CorpLogo"]

D. [component type="content" context="current" key="Body"]

[component name="SiteNav"]

[component name="CorpLogo"]

Answer: C

Question No : 23

AT Corp's website contains a number of Terms and Conditions statements. Each of these statements contains the date through which the statements are valid. Sam, a developer, does not want to hard code this value in each of the Terms and Conditions statements. What can Sam do to centralize the management of this date?

- A.** Use the [date] tag within each Terms and Conditions component.
- B.** Use the [calendar] tag within each Terms and Conditions component.
- C.** Create a Calendar component. Reference this component in each Terms and Conditions statement.
- D.** Create a Date and Time component. Reference this component in each Terms and Conditions statement.

Answer: D

Question No : 24

When using the Element tag, the type parameter allows you to use any of the following values, except which one?

- A.** Content
- B.** Selected
- C.** Parent
- D.** Top

Answer: B

Question No : 25

The AT Printer Corp is a manufacturer of computer printers. They are building a new website using Lotus Web Content Management. The site contains pages that describe each of their product lines. When content creators are creating a product content item, they are required to include one of five preformatted company slogans as a part of the content. Which of the following action can Jim, a developer, do to facilitate this requirement easily?

- A.** Jim creates an authoring template and adds all five slogans as HTML components to the authoring template. The HTML components are then referenced in an Option Selection element on the authoring template.
- B.** Jim first creates an Option Selection component in the Component library with all five slogans. Jim then adds this Option Selection component to the authoring template using Manage Elements.
- C.** Jim gives content creators the Contributor role on the authoring template. Content Creators can then use Manage Elements to add a new field to each content item for the slogan.
- D.** Jim first creates five HTML components in the Component library; one for each slogan. Jim can add a Component Reference element to the authoring template.

Answer: D

Question No : 26

What is the default content form layout for all authoring templates?

- A.** Tabbed
- B.** Labeled sections
- C.** Collapsible sections
- D.** The default can be changed for each library.

Answer: A

Question No : 27

When using the Component tag, the parameter compute is applicable to all of the following components, except which one?

- A. Menu component
- B. Taxonomy component
- C. Navigator component
- D. Search component

Answer: D

Question No : 28

Julie is a developer. In creating a series of Terms and Conditions statements, she always needs to reference the company's Tax Identification Number (for example, 09291966). Because this number needs to be reused repeatedly, Julie chooses to create this Tax Identification Number as its own element. Which element type is best suited for this need?

- A. Text
- B. Number
- C. Integer
- D. Rich text

Answer: B

Question No : 29

Joe is building a website using Lotus Web Content Management. He is tasked with setting up the authoring template and presentation template so that his team can create content for new products when it is available in the company website. Each product has its own image. These are stored as Image components by the media group and content authors must use these images. What can he do to enable the authors to reference the corresponding image when creating the content with product details?

- A. A component-reference element can be added to an authoring template. This action then allows content creators to select an existing Image component from the component library with the appropriate image when creating content.
- B. An Image-reference element can be added to an authoring template. This action then allows content creators to select an existing Image component from the component library with the appropriate image when creating content.

C. A component-reference element can be added to an authoring template. This action then allows content creators to select an existing Image component from the component library with the appropriate image when creating content.

D. A Image element can be added to an authoring template. This action then allows content creators to upload the image directly when creating content. The media group must deliver the images directly to content authors instead of creating an Image component.

Answer: C

Question No : 30

Which of the following author time search queries is invalid?

- A.** +content -draft
- B.** -draft
- C.** +content +draft
- D.** draft*

Answer: B

Question No : 31

Fred wants to use a custom rich text editor as the default for the Authoring portlet of his Lotus WebContent Management server. Which statement best describes the steps that he must follow to carry this out?

- A.** He cannot; only the default editors can be used.
- B.** Fred copies the JSP file supplied by the independent rich text editor to his portal and references it in the Authoring portlet.
- C.** Fred copies the JavaScript file supplied by the independent rich text editor to his portal and references it in the Authoring portlet
- D.** Fred references the JSP file supplied by the independent rich text editor and references it in the Authoring portlet. There is no need to copy any files because the file does not need to be deployed to the portal.
