QUESTION 1

Lenni added a style sheet to an XPage using a URL link. The style sheet contains a class to format text to be red and bold. She applied the class to a label control; however, when she previews the XPage in a web browser, the label text is bold but the font is black.

Which of the following could be causing the label font to be black?

- A. A color style cannot be applied to label text.
- B. Black is selected in the font color properties of the label.
- C. The style sheet must be imported into the XPage application.
- D. The style applied to the table cell where the label resides is overriding the label style.

Correct Answer: B

QUESTION 2

Priscilla has used the Set Value simple action to define the value of the Author field on her XPage. Which of the following is a valid binding in the Expression Language?

- A. [dominoDocument1.Author]
- B. "dominoDocument1.Author"
- C. {dominoDocument1.Author}
- D. #{dominoDocument1.Author}

Correct Answer: D

QUESTION 3

Luke accidentally closed the applications navigator in Domino Designer and now he cannot see the list of design elements that he's working on. How can he get it back?

- A. Close Domino Designer and reopen it.
- B. Click Window > Show Eclipse Views > Applications from the menu
- C. Close Domino Designer and Notes, delete desktop.ndk, and reopen Notes and Designer.
- D. Close Domino Designer and Notes, delete bookmarks.nsf, and reopen Notes and Designer.

Correct Answer: B

QUESTION 4

John has an application that contains a form named "Order". His boss has asked him to create an XPage that will be used to create documents similar to the "Order" form. How can he ensure that he includes all of the fields that form contains to the XPage?

- A. Define a document data source based on the form and drag the document from the Data Palette to the XPage
- B. Define a document data source based on the form and drag all of the fields from the Data Palette to the XPage
- C. Define a document data source based on the form and drag the document from the Controls Palette to the XPage
- D. Define a document data source based on the form and drag all of the fields from the Control Palette to the XPage

Correct Answer: B

QUESTION 5

Mike wants to add a delete button to his XPage so that the owner of the document can delete the document. In the following code, Mike wants to prompt the user to verify that the user wants to delete this document.

What attribute and value can he use to complete the code?

- A. alert="Are you sure you want to delete current document?"
- B. prompt="Are you sure you want to delete current document?"
- C. msgbox="Are you sure you want to delete current document?"
- D. message="Are you sure you want to delete current document?"

Correct Answer: D

QUESTION 6

Hannah wants to change her font type on her invoices XPage. What view in the Domino Designer allows her to do that?

- A. Page view
- B. Themes view
- C. Events view

D. Properties view

Correct Answer: D

QUESTION 7

Which of the following statements is wrong regarding the simple action "Modify Field"?

- A. The field name can be calculated.
- B. Modify Field directly edits the notes field inside the document.
- C. Not only the field name, but also the new value for the field can be calculated.
- D. If you need to find out which name a specific field on your XPage has, you can use GetElementById.

Correct Answer: B

QUESTION 8

Zach needs to ensure that every XPage in the Products application includes a copyright line. This text should display identically at the bottom of every XPage. How can Zach accomplish this task?

- A. Right-click Custom Controls from the application navigator and select New Custom Control. Supply the text and formatting. Drag this control from the controls palette onto the bottom of each XPage.
- B. Double-click Applications properties from the application navigator. In the Header and Footer area of the XPages tab, enter the text in the Footer Text field. Select the options for font, color, and justification.
- C. Create a page to hold the content. Right-click Custom Controls from the application navigator and select New Custom Control. Supply the name of the page for the Source property. Drag this control from the controls palette onto the bottom of each XPage.
- D. Create a subform to hold the content. Right-click Custom Controls from the application navigator and select New Custom Control. Supply the name of the subform for the Source property. Drag this control from the controls palette onto the bottom of each XPage.

Correct Answer: A

QUESTION 9
