Vendor:SAP

Exam Code:C_HANATEC_14

Exam Name:SAP Certified Technology Associate - SAP HANA 2.0

Version: Demo

QUESTION 1

Once you start the SAP HANA cockpit 2.0, From the Aggregated Health Monitor, navigate to the SAP

HANA system overview page. This page displays the detailed status of the selected SAP HANA system.

Which of the following options are listed?

There are 3 correct answers to this question.

Response:

A. Monitoring and Administration

B. Performance Management

C. Resource Management

D. Security

E. Memory Management

Correct Answer: ABD

QUESTION 2

Which of the following elements are valid rules for the location of the backup files?

There are 3 correct answers to this question.

Response:

A. The Volume ID is automatically added to a specified file name.

B. The backup files should never be in the same directory and on the same file system as the data.

C. The backup ID is unique for each persistence only.

D. The backup folder will be created automatically when the backup process is started.

Correct Answer: ABC

QUESTION 3

Which of the following database resources can be monitored at the DBA Cockpit Current Status Overview

monitor?

There are 3 correct answers to this question.

Response:

A. The time at which the database was started.

B. Disk consumption from the SAP HANA database.

C. Connection statistics about open connections.

D. Memory and CPU consumption from the SAP HANA database.

Correct Answer: ABD

QUESTION 4

You receive a new system from your hardware partner with SAP HANA 2.0 multitenant database

containers preinstalled.

What is a prerequisite to guarantee secure encryption of the data volumes?

Please choose the correct answer.

Response:

A. Change the generated SSFS master key for the whole database instance.

B. Change the generated password of the SYSTEM user.

C. Update the connection information stored in the hdbuserstore.

D. Regenerate the encryption root keys for the internal application encryption.

Correct Answer: C

QUESTION 5

You migrate a database to SAP HANA using the database migration option. Which tool do you use to split

tables?

Please choose the correct answer.

Response:

A. R3load

B. SAPinst

C. R3ta

D. SAPup

Correct Answer: D

QUESTION 6

USER A grants a privilege to USER B, and USER B grants the same to USER C afterwards. What

happens if you drop USER B from the HANA database?

Choose the correct answer.

Response:

A. The privilege is revoked from both USER A and USER C.

B. The privilege is revoked from USER C, but not USER A.

C. The privilege remains assigned to both USER A and USER C.

D. The privilege is revoked from USER A, but not USER C.

Correct Answer: B

QUESTION 7

Which best practices do you apply when you optimize the table distribution in a scale-out SAP HANA database?

There are 2 correct answers to this question. Response:

A. Cross-node joins must be avoided.

B. Table partitions can be distributed over all nodes.

C. The row store can be distributed over all nodes.

D. The columns of a table can be distributed over all nodes.

Correct Answer: BC

QUESTION 8

What are advantages of column store tables? There are 3 correct answers to this question. Response:

A. Data footprint is automatically reduced through compression

B. Only the columns required are actually loaded to memory

C. Columns can be partitioned

D. They are optimized for high-volume read / write transactional processing

Correct Answer: ABC

QUESTION 9

What is a prerequisite before you can install SAP HANA cockpit 2.0 as a central monitoring tool for

productive SAP HANA databases?

Please choose the correct answer.

Response:

A. SAP NetWeaver 7.5x on SAP HANA 2.0 with ABAP Core Data Services (CDS) and SAP Fiori installed

B. A central SAP HANA database 2.0 with SAP HANA extended application services, advanced model (XS Advanced) installed

C. SAP Solution Manager 7.2 on SAP HANA 2.0 with SAP HANA extended application services, advanced model (XS Advanced)

D. A dedicated server with at least 16GB of RAM with SUSE Linux Enterprise Server (SLES) or Red Hat Enterprise Linux (RHEL)

Correct Answer: D

QUESTION 10

Which of the following privileges allow read access to data in SAP HANA information models depending

on certain values or combination of values?

Choose the correct answer.

Response:

A. System Privileges

B. Object Privileges

C. Analytic Privileges

D. Package Privileges

Correct Answer: C

QUESTION 11

During an unplanned maintenance, the SAP HANA database system is NOT accessible. The root cause is

unclear.

Which SAP HANA cockpit 2.0 options allow you to investigate this situation?

There are 2 correct answers to this question.

Response:

A. Recover database

B. Troubleshoot unresponsive system

C. Launch cockpit for offline administration

D. Monitor performance

Correct Answer: BC

QUESTION 12

Which of the following statements are true regarding In-Memory computing security?

There are 2 correct answers to this question.

Response:

A. Data and undo log information (part of data) are automatically saved to disk at regular savepoints

B. The log is also saved to disk continuously and synchronously after each COMMIT of a database transaction

C. The redo log captures last 5 minutes changes by database transactions

D. After a power failure the system returns to its last consistent state by replaying the undo log since the last savepoint

Correct Answer: AB
