QUESTION 1

What is not a key characteristic of multipurpose architecture?

- A. Multi-tiered
- B. Open standards
- C. Security
- D. Server virtualization

Correct Answer: C

QUESTION 2

What is a benefit of virtual client operating systems in protection against virus infections?

- A. A virus infection in one operating system will not infect the other operating systems.
- B. One virus scanner on a client operating system will protect all other operating systems.
- C. The client operating systems are virtual and cannot be infected from outside.
- D. The client operating systems can be protected by the virus scanner of the host operating system.

Correct Answer: A

QUESTION 3

What is the operational benefit of software licensing for a Cloud solution?

- A. Operational costs are part of capital expenditure.
- B. Platform costs are much more stable.
- C. Server costs are lower.
- D. Software licensing may no longer impact capital expenditure.

Correct Answer: D

QUESTION 4

What is the benefit of replication of data center sites?

- A. data protection
- B. disaster recovery

- C. extended data storage
- D. increased response rate

Correct Answer: B

QUESTION 5

What is the intended result of a Distributed Denial of Service (DDOS) attack on a web site?

- A. To change the content of the site to prevent it from providing further services
- B. To distribute the content of the site to users who are denied access to its service
- C. To infect the site to distribute a virus to users, which denies them access to further services
- D. To lock users out of the site by exhausting the sites resources

Correct Answer: D

QUESTION 6

What is the purpose of a load balancer?

- A. To distribute and balance the load when provisioning/de-provisioning
- B. To spread the load of applications over the day
- C. To make sure that each network request has exactly one response
- D. To generate load on a test server

Correct Answer: A

QUESTION 7

What do we call the threat of data compromised due to unauthorized access?

- A. Account service and traffic hijacking
- B. Data loss/leakage
- C. Insecure application interfaces
- D. Shared technology vulnerabilities

Correct Answer: B

QUESTION 8

What is meant by data partitioning in the Cloud?

- A. formatting a hard disk to allow for very big files
- B. keeping data from one Cloud user on a single hard disk
- C. keeping data from one Cloud user safe from other users
- D. splitting data into small parts so they fit more easily on a solid state disk

Correct Answer: C

QUESTION 9

Which kinds of audit mechanisms are available in ISQ/IEC 20000:2011?

- A. An internal audit mechanism
- B. An external audit mechanism
- C. An internal and external audit mechanism
- D. No audit mechanisms

Correct Answer: C

QUESTION 10
