**Vendor:**HP

**Exam Code:**HP0-J65

**Exam Name:**Designing HP SAN Networking Solutions

**Version:**Demo

**QUESTION 1**

Which three are included in the four major classifications of SAN management? (Choose three.)

- A. Fabric management
- B. Device LUN management
- C. Storage management
- D. SAN usage and monitoring

Correct Answer: ACD

---

**QUESTION 2**

What is a common feature of 1 Gb and 2 Gb Fibre Channel switches?

- A. use LC to LC cables
- B. 500 m length using 62.5/125 micron
- C. use 2.125 GHz SFP transceivers
- D. use 50/125 micron cabling
- E. support ISL trunking

Correct Answer: D

---

**QUESTION 3**

Which licensed feature allows a customer to collect historical performance data and perform hot spot analysis on a C-series SAN fabric?

- A. Advanced Web tools
- B. SAN Connection Manager
- C. Advanced Performance Monitor
- D. MDS Fabric Manager Server software

Correct Answer: D

---

**QUESTION 4**

A customer has an existing H-series, single-fabric SAN. They want to create a dual heterogeneous SAN fabric.

Which configuration should you reselection?

- A. HP B-series and HP C-series SAN Switches
- B. HP H-series and HP B-series SAN Switches
- C. HP B-series SAN Switches
- D. HP H-series SAN Switches

Correct Answer: B

---

#### QUESTION 5

Which HP 3PAR InForm Operating System feature provides Tier 1 resiliency and allows for non-disruptive online software upgrades on HP 3PAR StoreServ Storage systems without relying on multipathing software?

- A. HP 3PAR Autonomic Rebalance
- B. HP 3PAR Access Guard
- C. HP 3PAR Persistent Cache
- D. HP 3PAR Persistent Ports

Correct Answer: D

---

#### QUESTION 6

Which statement describes the HP Adaptive Infrastructure?

- A. It is a bundle of hardware and management software which meets the requirements of all enterprise customers.
- B. It must be specifically designed for one application.
- C. It is a fixed solution which meets the customer requirements for the next decades.
- D. It synchronizes business and IT to rapidly respond to new business needs.

Correct Answer: D

---

#### QUESTION 7

Scenario

Following the merger of two financial companies, management is considering combining the two distinct customer call centers into a single physical location. In addition to the overall call center headcount increasing by 30%, the support for

two distinct customer bases presents the potential of having two different desktop PCs on the desk of each call center employee. Instead of correspondingly increasing IT support headcount to manage the single, larger call center and call

center infrastructure, management believes they can reduce the required time to support call center operations by 40% if they employ virtual desktop technology.

An initial assessment has identified the need for a centralized storage solution that could support 500 virtual desktops running a variety of applications that can scale quickly to accommodate an expected increase in call center staff. The

customer is already an HP Blade System customer using HP Virtual Connect Flex-10.

Some of the additional business criteria identified in customer planning interviews includes:

Use client virtualization for the desktops.

Achieve the highest possible density and performance for the virtual desktops, but keep the virtual desktop storage traffic off the network due to a current, existing limitation of only 1GbE.

Do not use standalone, network-attached storage.

Limit the impact of additional rack space.

Minimize the risk of additional help-desk tickets.

Present multiple solutions, prioritized with a recommendation.

Refer to the scenario.

Your proposed design includes a VMware View environment using HP StoreVirtual 4800. What has to be considered when designing a solution?

- A. Offer asynchronous replication to keep the virtual desktops up and running in case of a component failure.
- B. Use VMware View provisioning servers outside the blade to minimize LAN traffic to the enclosure.
- C. Avoid boot storms and insufficient response times during critical shift change hours.
- D. Include HP Virtual Connect FlexFabric to connect to the HP StoreVirtual environment.

Correct Answer: C

---

## QUESTION 8

Which features are included at no cost with the HP StorageWorks 8/24 SAN switch? (Select two.)

- A. hardware enforced zoning
- B. Adaptive Networking
- C. web tools
- D. ISL trunking
- E. fabric watch
- F. extended fabric

Correct Answer: AC

---

**QUESTION 9**

Which SAN component product provides network fault isolation?

- A. 8Gbs SFP
- B. Brocade MPR400
- C. Emulexfibre channel HBA
- D. IP Distance Gateway

Correct Answer: B

---

**QUESTION 10**

Which HP document provides detailed information on HP StorageWorks EML E-Series tape library configuration and the relevant patches required on the backup application?

- A. HP SAN Design Reference Guide
- B. HP EBS Design Guide
- C. HP EBS Configurator
- D. HP System Insight Manager Planning Guide

Correct Answer: B

---

**QUESTION 11**

Which HP tool provides the ability to create a Microsoft Visio diagram of a SAN topology for your customer documentation?

- A. SAN Health
- B. SAN Designer
- C. SAN Visibility
- D. SAN Navigator

Correct Answer: C

---

**QUESTION 12**

What is the best SAN topology for a many-to-many distributed data locality?

- A. meshed fabric

B. fat tree backbone fabric

C. ring fabric

D. cascaded fabric

Correct Answer: B
