**Vendor:**HP

**Exam Code:**HP2-N47

**Exam Name:**Selling HP Application Lifecycle  
Management Solutions

**Version:**Demo

**QUESTION 1**

Which product enables a performance tester to uncover code-level issues during the performance testing phase?

- A. HP Performance Center
- B. HP Unified Functional Testing
- C. HP Fortify
- D. HP Diagnostics

Correct Answer: A

---

**QUESTION 2**

Which capability of HP Application Lifecycle Management differentiates it from competitors by providing visibility into key project milestones and automatically updates project status against those milestones?

- A. requirements management
- B. project planning and tracking
- C. process enablement
- D. application lifecycle intelligence

Correct Answer: D

---

**QUESTION 3**

How can testers create functional performance, and application security defects in the HP Quality Center?

- A. by using the defect submission and reporting wizard found in QCE
- B. manually or directly from the execution of manual and automated tests
- C. by importing a list in a pdf file
- D. only through the execution of automated tests

Correct Answer: B

---

**QUESTION 4**

In addition to cost reduction and risk mitigation, what is a benefit of HP Agile Manager on SaaS?

- A. greater revenue

- B. time to value
- C. fewer outages
- D. less downtime

Correct Answer: B

---

#### **QUESTION 5**

What is the value of the HP SaaS offering for Application Lifecycle Management to a customer with cost concerns?

- A. It can demonstrate a faster time to value and have lower TCO.
- B. It has user functionality that the on-premise option does not provide
- C. It can improve all aspects of lifecycle management.
- D. It reduces the amount of functional testing that an organization needs to automate.

Correct Answer: B

---

#### **QUESTION 6**

Refer to the following statement.

"Separate components, applications, and services are woven together to provide a seamless user experience."

This is an example of a response to which ALM challenge?

- A. lowering solutions\'\' TCO while adapting to the demands of faster delivery
- B. managing and developing composite applications
- C. linking business requirements to IT priorities for better alignment
- D. providing traceability of requirements to all stakeholders

Correct Answer: B

---

#### **QUESTION 7**

Which most accurately describes the HP Application Lifecycle Management suite?

- A. a unified software suite for accelerating the delivery of secure: reliable, modern applications
- B. a product used to manage test requirements through application delivery
- C. a solution that allows management of application lifecycle as a business process

D. a suite of stand-alone tools for accelerating the delivery of secure, reliable, modern applications

Correct Answer: A

---

#### **QUESTION 8**

What is a benefit of HP ALM over similar competitor products?

- A. It is focused on the developer market and is developer-centric.
- B. It is priced competitively in the market and includes a number of features that are free of charge.
- C. It is highly rated by market analysts such as Gartner
- D. It is technology and methodology agnostic and integrates the entire application lifecycle.

Correct Answer: B

---

#### **QUESTION 9**

During performance testing, which solution capabilities allow testers to identify and eliminate performance bottlenecks?

- A. defect tracking, reporting, and diagnostics
- B. test planning, scheduling, and execution
- C. monitoring, analysis, and diagnostics
- D. real-time reporting in Quality Center

Correct Answer: C

---

#### **QUESTION 10**

Which statement best describes the purpose of regression testing in software development?

- A. Regression testing is limited in that it tests the isolated functionality without the interdependencies of other software.
- B. Regression testing is used to verify system-wide business functionality, performance, and security.
- C. Regression testing is used to evaluate the end user experience and get real world feedback into the team to address issues
- D. Regression testing is used to ensure that new functionality does not result in another fault somewhere else in the software.

Correct Answer: B

---

#### **QUESTION 11**

Why is the concept of Continuous Integration and Testing important to the Agile conversation?

- A. Merely increasing the pace of development without addressing the full software development lifecycle will cause bottlenecks in other aspects of the lifecycle.
- B. It increases the total number of sprints required to complete a software project and will reduce delivery costs and increase quality.
- C. It gives organizations the ability to align business processes and functional testing with performance and security testing to ensure better quality.
- D. Simply reducing the total number of sprints required to complete a software project will reduce delivery costs and increase quality.

Correct Answer: B

---

## **QUESTION 12**

In agile delivery, who is responsible for maintaining the product backlog?

- A. the product expert
- B. the product owner
- C. the project manager
- D. the scrum master

Correct Answer: B
