

**Exam** : **JN0-520**

**Title** : Juniper networks Certified  
internet associate(jncia-fwv)

**Version** : Demo

1. What are two (2) benefits of configuring the NetScreen in transparent mode?

- A. There is no need for IP addresses even for remote management
- B. There is no need to reconfigure the IP addresses of routers or protected servers
- C. There is no need to create Mapped or Virtual IPs for incoming traffic to reach protected servers
- D. Policies are easier to create since you do not have to include Source and Destination IP addresses
- E. The product can support more VPNs and obtain greater throughput because there is less overhead to manage

**Answer:** BC

2. Click the Exhibit button to view the exhibit.

If A initiates a Web browsing session with B, and the Trust interface of the 5XT is in NAT mode, what could be the source address/port of the packet arriving at host B?

- A. 10.0.0.5/80
- B. 10.0.0.5/1099
- C. 10.0.0.1/1024
- D. 20.0.0.1/1024
- E. 1.1.1.250/1024

**Answer:** E

3. Which cannot be enabled when creating an Access Policy entry?

- A. Setting the tcp-mss size
- B. Applying NAT using DIP pools

C.Logging all connections that match the Access Policy D.Triggering a traffic alarm if traffic goes above 300 Bytes/Sec E.Scheduling the policy to take effect between Monday through Friday only **Answer: A**

4. Which policy action is needed in order to add Deep Packet inspection to a policy?

- A.IDP
- B.Deny
- C.Reject
- D.Permit
- E.Detect

**Answer: D**

5. You have one VIP configured on your device, using public address 191.111.222.5. When you configure the policy, what will you select for the VIP, and where will you select it?

- A.VIP::1 in the NAT-dst public field B.VIP::1 as the destination address
- C.VIP(191.111.222.5) in the NAT-dst public field
- D.VIP(191.111.222.5) as the destination address **Answer: B**

6. Your VPN tunnel does not pass traffic. You run the "get ike cookie" command and discover that there is no cookie. What two (2) options should you check first?

- A.Routes
- B.Policy configuration
- C.Phase 1 configuration options
- D.Phase 2 configuration options

**Answer: AC**

7. By default, from which hardware component is the startup copy of the ScreenOS loaded?

- A.ROM
- B.NVRAM
- C.TFTP server
- D.Internal Flash
- E.PCMCIA Card

**Answer: D**

8. Using the CLI, if the startup copy of the ScreenOS on a NS-204 is corrupted, from which two (2) alternate locations can an image be loaded?

- A.ROM
- B.TFTP server
- C.Internal Flash
- D.PCMCIA Card
- E.Compact Flash Card

**Answer: BE**

9. Assuming factory default settings, which statement describes the minimum requirements for WebUI management access?

- A.Connect a PC addressed on the 192.168.1.0 subnet to any interface, open a browser and access 192.168.1.1
- B.Terminate the bootup sequence from the console device, open a browser on the console device and access 192.168.1.1
- C.Connect a PC addressed on the 192.168.1.0 subnet to the lowest numbered interface, open a browser and access 192.168.1.1
- D.Using the CLI, define an IP address on a physical interface, connect a PC to the interface and open a browser to the interface address
- E.Using the CLI, assign an IP address to the VLAN1 interface, connect a PC to any interface and open a browser to the VLAN interface address

**Answer: C**

10. When configuring the Untrust interface with an IP address and enabling Telnet and WebUI management, which sequence of steps must be performed to make the interface operational at the end of the configuration sequence?

A.Assign the interface to a zone, define the IP address, enable Web and Telnet services

B.Assign the interface to a zone, define the IP address, accept default management services

C.Assign the interface to a virtual router, define the IP address, enable Web and Telnet services

D.Assign the interface to a zone, define the IP address, define a manage IP address, accept default management services

E.Assign the interface to a virtual router, define the IP address, define a manage IP address, enable Web and Telnet services

**Answer: A**

11. Which statement is correct regarding administrator privileges? A.Any

Administrator can change their privileges on an as-needed basis

B.Administrator privileges can only be established and changed by the Root Administrator C.Administrator privileges can be established and changed by the Root and All-privilege Administrator D.Administrator privileges can only be established by the Root and can be changed by the Root and All-privilege Administrator

**Answer: B**

12. What is the purpose of the 'Permitted IP' address on a NetScreen device?

A.It defines which range of addresses can access devices connected to the NetScreen B.It

defines a list of addresses that are trusted to perform management on the NetScreen C.It

is used in policy rules to determine which user traffic is allowed through the NetScreen

D.It is the address to which an external device connects in order to gain management access to a NetScreen

E.It defines a list of devices whose traffic can pass through the NetScreen without being authenticated

**Answer: B**

13. Which three (3) statements are correct regarding tasks that can be performed only by the Root

administrator?

- A.reset command
- B.unset all command
- C.activate/deactivate asset recovery features
- D.replace configs from remote devices to flash
- E.On-line asset recovery

**Answer:** BCD

14. What is the purpose of the 'Manage-IP' address on a NetScreen device?

- A.It defines which range of addresses can access devices connected to the NetScreen
- B.It defines a list of addresses that are trusted to perform management on the NetScreen
- C.It is used in policy rules to determine which device is allowed to manage the NetScreen
- D.It is the address to which an external device connects in order to gain management access to a NetScreen
- E.It defines a list of device addresses that can manage the NetScreen without being authenticated prior to session establishment

**Answer:** D

15. When managing a NetScreen device via the WebUI and performing an image upgrade, from which hardware component can the the ScreenOS image be loaded?

- A.TFTP server B.PC  
local disk C.Internal  
Flash D.PCMCIA Card
- E.Compact Flash Card

**Answer:** B

16. When managing a NetScreen device via the CLI and performing an image upgrade, from which hardware components can the the ScreenOS image NOT be loaded?

- A.TFTP server

- B.PC local disk
- C.Internal Flash
- D.PCMCIA Card
- E.Compact Flash Card

**Answer: B**

17. In the command "save config from tftp 1.1.7.250 abcd.cfg merge", what function does the 'merge' parameter specify?

- A.The config file from the TFTP server will replace the configuration in RAM
- B.The config file from the TFTP server will replace the startup configuration file in Flash
- C.The 'merge' parameter is not valid for TFTP files; it is only valid for configuration files stored in Compact Flash
- D.The config file from the TFTP server will be combined with the configuration file in RAM and the combined result will be saved to Flash
- E.The config file from the TFTP server will be combined with the configuration file in RAM and the startup configuration file will remain unchanged

**Answer: D**

18. Which statement best describes the 'config rollback' feature?

- A.Config rollback must be enabled by an administrator. Once enabled, it allows the administrator to re-apply a previously saved configuration file from Flash.
- B.Config rollback is enabled by default; it allows the administrator to re-apply a previously saved configuration file from Flash without rebooting.
- C.Config rollback is enabled by default; it allows the administrator to re-apply a previously saved configuration file from Flash by rebooting and loading a "last known good" configuration.
- D.Config rollback allows the administrator to revert to the prior ScreenOS image in the event an upgrade operation aborts.
- E.Config rollback allows the administrator to revert to the prior ScreenOS image or configuration file in the event an upgrade operation aborts.

**Answer: C**

19. By default, where are changes stored when a "save" command is issued from the CLI during a management session?

- A.NVRAM B.Internal Flash C.PCMCIA Card
- D.Compact Flash Card

**Answer: B**

20. When changes are made to the running config during a WebUI management session, to what external hardware component can the changes be saved?

- A.FTP server
- B.LDAP server
- C.TFTP server
- D.PC local disk
- E.Compact Flash Card

**Answer: D**

21. What is the purpose of the VLAN1 interface?

- A.It provides policy-based NAT for 802.1Q VLANs
- B.It provides an interface that can be used with all 802.1q VLANs in transparent mode
- C.It provides the NetScreen with a routable IP address while operating in route mode
- D.It provides an interface that can be used to remotely manage the NetScreen while operating in transparent mode

**Answer: D**

22. Which three (3) statements are true in regards to a NetScreen device in transparent mode?

- A.All interfaces belong to VLAN1 zone for management
- B.VPNs can terminate to the VLAN1 interface IP address
- C.Static routes must be configured if multiple virtual routers are going to be used

- D.It can be installed in a network without the requirement to reconfigure ip addressing schemes
- E.You must use the console port to manage the device as you cannot manage the device via an ethernet port.

**Answer:** ABD

23. When a device is in transparent mode, which fields will be modified as the traffic transverses the firewall?

- A.None of the above
- B.The source port only
- C.The source and destination IP
- D.The source IP but not the destination IP
- E.The destination IP but not the source IP

**Answer:** A

24. What must be configured to remotely manage a NetScreen device operating in transparent mode?

- A.An IP address must be configured for VLAN1
- B.The telnet management service must be enabled on the VLAN1 interface only
- C.An IP address must be configured for the VLAN zone
- D.The V1-Trust interface needs to have management services enabled
- E.The public SNMP community string must be configured

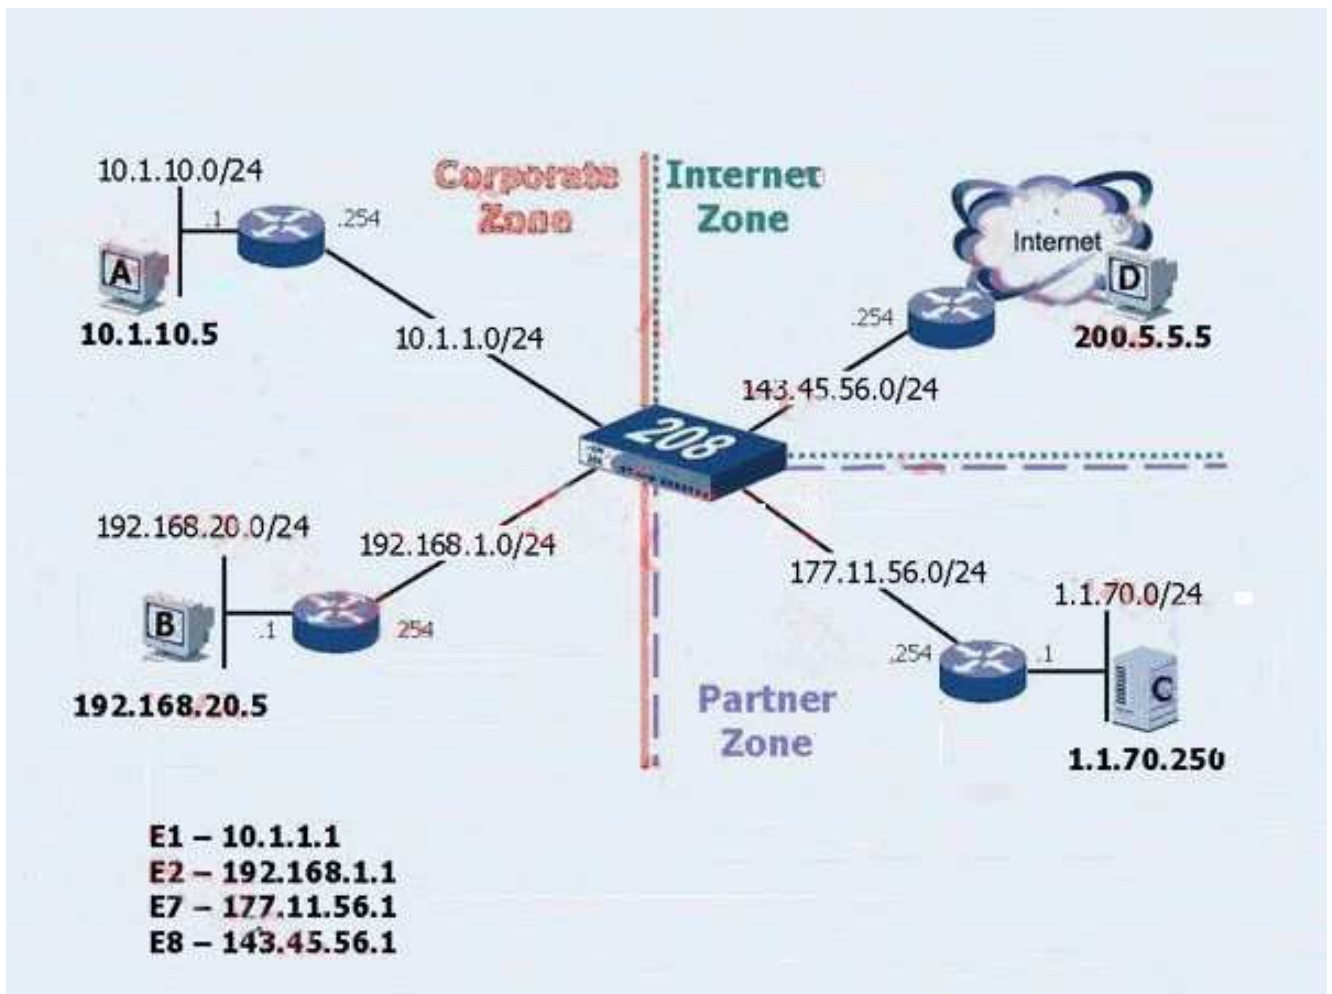

**Answer:** A

25. In transparent mode, you can create policies between which zones?

- A.V1-Trust and Untrust
- B.Private and L2-Public
- C.V1-Global and V1-Global
- D.V1-Trust and Private (L2)
- E.V1-Untrust and L2-Private

**Answer:** E

26. Click the Exhibit button to view the exhibit.

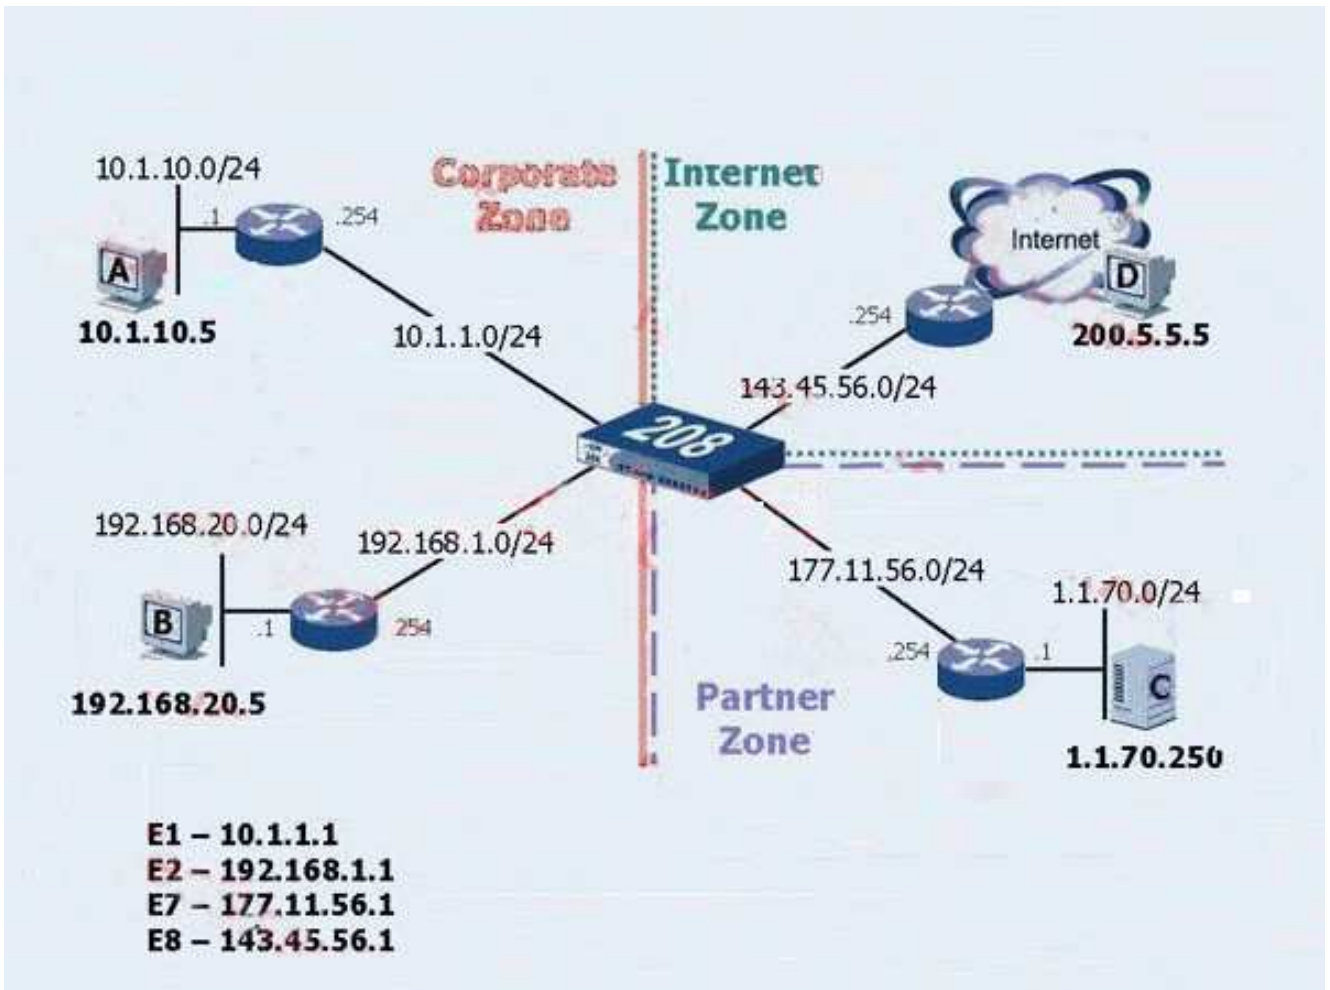

In order for the 208 to have full reachability to all hosts in the network, how many static routes need to be added?

- A.1
- B.2
- C.3
- D.4
- E.5

**Answer: D**

27. Click the Exhibit button to view the exhibit.

Review the exhibit. What would be the best routing command to allow host A to communicate with host C?  
(Assume a route from the 208 to Host A's subnet already exists.)

- A.set route 0.0.0.0/0 int e7 gateway 177.11.56.254
- B.set route 1.1.70.0 interface e7 gateway 177.11.56.254
- C.configure route 1.1.70.0/24 gateway 177.11.56.254 int e7
- D.set route 1.1.70.0/24 interface e7 gateway 177.11.56.254

**Answer: D**

28. You are configuring a NetScreen device in transparent mode and want to provide additional administrative security. Which two (2) options would you set?

- A.set int vlan1 ident-reset
- B.set int vlan1 broadcast arp
- C.set int vlan1 broadcast flood
- D.set admin manage-ip

E.set int vlan1 ip manage-ip

**Answer:** BE

29. When configuring a NetScreen device in transparent mode, what is required to forward traffic?

A. There must be at least one policy configured

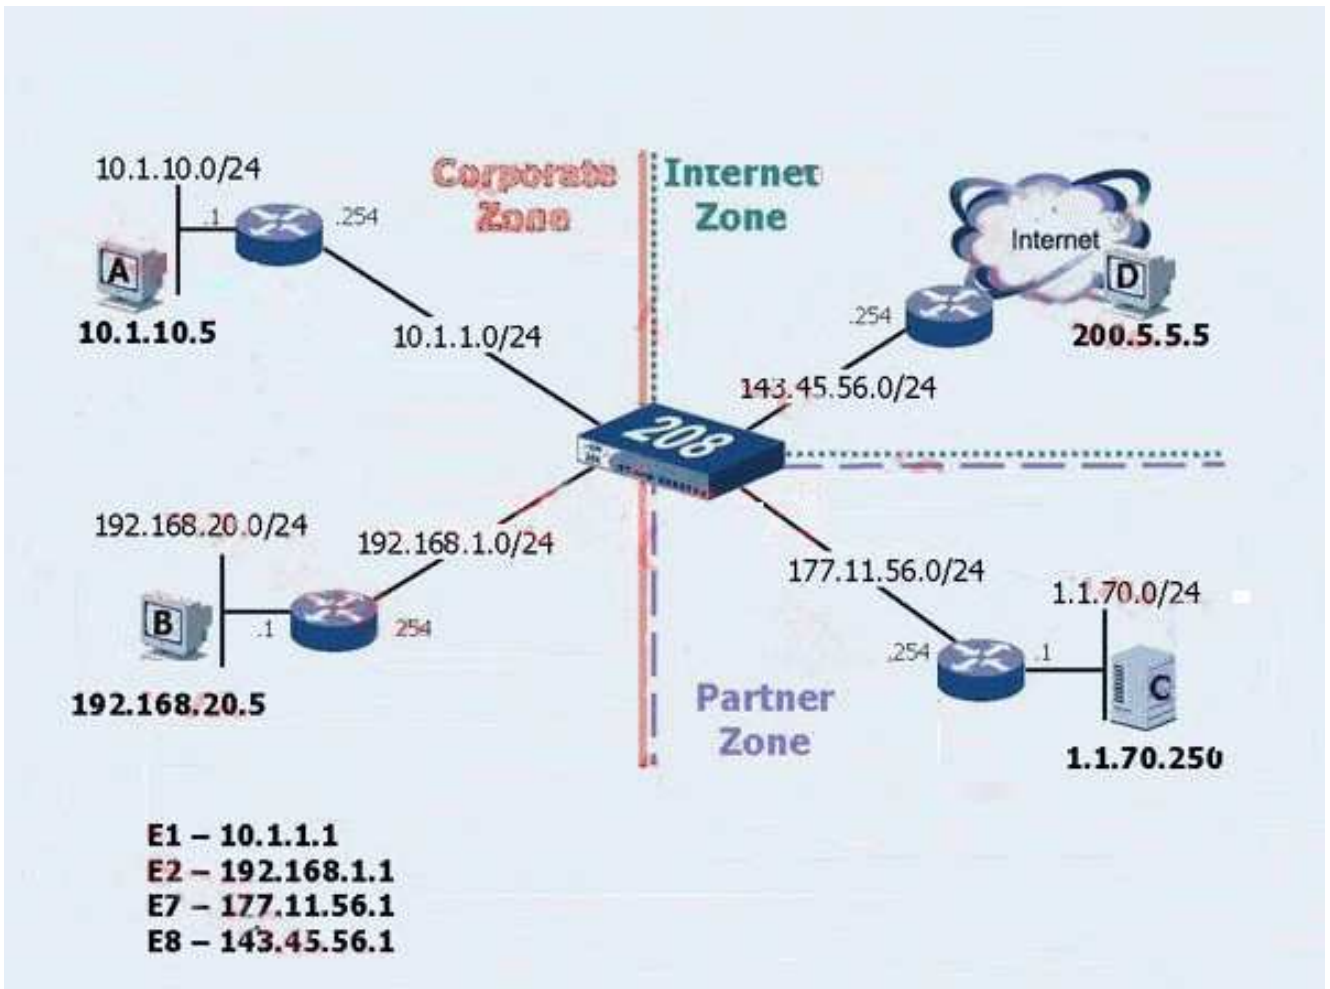

B. The VLAN1 interface must have a manage-ip value set

C. The VLAN1 interface must have an ip address configured

D. The NetScreen device must have the transparent option set under admin options

**Answer:** A

30. Click the Exhibit button to view the exhibit.

What is the correct command to configure a default route?

A.set route 0.0.0.0/0 vrouter untrust

B.set route 255.255.255.255/255 int e8 gate 0.0.0.0

C.set route 0.0.0.0/0 interface e8 gateway 143.45.56.254

D.set route 0.0.0.0/0 interface e8 next-hop 143.45.56.254

E.set route 0.0.0.0/0 interface 143.45.56.1 gate 143.45.56.254

**Answer: C**

# Trying our product !

- ★ **100%** Guaranteed Success
- ★ **100%** Money Back Guarantee
- ★ **365 Days** Free Update
- ★ **Instant Download** After Purchase
- ★ **24x7** Customer Support
- ★ Average **99.9%** Success Rate
- ★ More than **69,000** Satisfied Customers Worldwide
- ★ Multi-Platform capabilities - **Windows, Mac, Android, iPhone, iPod, iPad, Kindle**

## Need Help

Please provide as much detail as possible so we can best assist you.

To update a previously submitted ticket:

 <b>One Year Free Update</b> <p>Free update is available within One Year after your purchase. After One Year, you will get 50% discounts for updating. And we are proud to boast a 24/7 efficient Customer Support system via Email.</p>	 <b>Money Back Guarantee</b> <p>To ensure that you are spending on quality products, we provide 100% money back guarantee for 30 days from the date of purchase.</p>	 <b>Security &amp; Privacy</b> <p>We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information &amp; peace of mind.</p>
