Eduardo chose Native OS style when he created an editable text field on a form. In which one of the following ways does the field appear to Notes users?

A. An outlined rectangle.
B. Blank space marked off by red brackets.
C. Blank space marked off by black brackets.
D. The field does not display to Notes users. It is only visible to Web users.

QUESTION NO: 10

Erica has created a Registration form for the Customer Orders application. She has set the Type

option of the Pwd field to Password. What do users see displayed as they populate the Pwd field?

A. An asterisk displays for each character that is typed.
B. The encrypted value of each character is displayed as the user types.
C. The user sees nothing displayed, but the typed characters are captured and stored as an
 encrypted value.
D. As the user types in thePwd field, the typed characters display. When focus leaves the field,
 asterisks display, and the typed characters are stored as an encrypted value.

Answer: A

QUESTION NO: 11

When Robert created a Response form, he set the Formulas inherit values from selected
document option on the form properties. The Status field on the Review form is also named Status
on the inheriting form. However, the form does not inherit any data. Which one of the following
most likely caused this problem?

A. He failed to specify the form type.
B. The inheriting form is not a Response form.
C. He specified the same field names on both forms.
D. He failed to provide inheritance formulas for each field.

Answer: D

QUESTION NO: 12

form is opened in the Notes client. How can he configure his application to accomplish this task?

A. There is no way to do this; sections always open expanded.
B. Modify the section property Opened forReading to auto-hide.
C. Change the section type from standard to controlled access.
D. Modify the section property Opened forReading to auto-collapse.

Answer: D

QUESTION NO: 18

Rosa created a formula for a shared action. The code is supposed to set the value of an existing field called Surname. She used the following formula:
Surname := @Propercase(Surname);
After the formula runs, the Surname field still has the original value. Which one of the following is the reason?

A. There is no @Save command in the formula that would allow the field value to be updated.
B. When setting the value of a field, the formula must be in the field's Input Translation event.
C. The text string in the formula is set to null, so Notes does not permanently change the field value.
D. The formula does not specify that Surname is an existing field, so it is interpreted as a
 temporary variable.

QUESTION NO: 19

Richie has created an administrative view in the Video Rental application to show when each document was created. What @Function can he use to show the date and time that the document was created?
