Operations Apps Solution Architect

Version:Demo

QUESTION 1

A company use Dynamics 365 Business Central.

The company identifies the following issues:

Users report they cannot perform planning and dispatching of service orders or track bills of material in the system.

The finance department says that licensing costs are higher than budgeted.

You need to recommend a solution to address the issues.

What should you recommend?

- A. Use the Lifecycle Services business process modeler to create service order management and manufacturing tasks in the BPM Library.
- B. Perform a fit-gap analysis. Implement service order management and manufacturing business processes and license changes.
- C. Configure all users as Business Central Premium users.
- D. Ensure that the service order management and manufacturing processes steps are documented in a flow chart.
- E. Configure all users as Business Central Essentials users.

Correct Answer: B

QUESTION 2

A company wants to upgrade their current AX 2009 system to Dynamics 365.

You need to recommend a supported upgrade strategy for code and transactional data for the previous five years.

Which two options should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Use the Data migration tool (DMT) to move the data from AX 2009 to Dynamics 365.
- B. Use Lifecycle Services Code upgrade tool to directory upgrade the code base from AX 2009 to Dynamics 365.
- C. Upgrade code from AX 2009 to AX 2012, and then AX 2012 to Dynamics 365.
- D. Use the Data Import/Export Framework to migrate the data from AX 2009 to Dynamics 365.

Correct Answer: AC

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/migration-upgrade/data-migration-tool>

QUESTION 3

HOTSPOT

A distribution center uses Dynamics 365 Supply Chain Management.

When product returns are received at the distribution center, they are inspected, and a replacement is sent to the customer. Customer service processes both the return receipts and replacement orders to speed up the process.

The system must be able to prevent a single user from completing an entire return process.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Scenario	Recommendation								
The ability to process the receipt of the returned product.	<table border="1"><tr><td data-bbox="940 987 1396 1043"></td><td data-bbox="1396 987 1466 1043">▼</td></tr><tr><td data-bbox="940 1043 1466 1088">Field security</td><td></td></tr><tr><td data-bbox="940 1088 1466 1133">Security role</td><td></td></tr><tr><td data-bbox="940 1133 1466 1171">Segregation of duties rule</td><td></td></tr></table>		▼	Field security		Security role		Segregation of duties rule

QUESTION 4

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.

The company's main priorities are uninterrupted factory and distribution center operations, master data management, financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement cross-premises Microsoft Azure virtual network between the distribution centers, factories, and the Microsoft data center.

Does the solution meet The goal?

A. Yes

B. No

Correct Answer: A

QUESTION 5

DRAG DROP

A professional services company is implementing Dynamics 365 Finance. The company has the following business entities:

Company	Comments
CompanyA	This is a company that reports on behalf of all organizational units.
OperationsB	This is a transactional company that operates with their own tax ID.
OperationsC	This is a regional business unit within OperationsB.
OperationsD	This is a transactional company that operates with their own tax ID.

You need to configure the system to support this organizational structure.

How should you configure the organization? To answer, drag the appropriate configurations to the correct entities. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll.

to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Configurations

- Legal entity
- Financial dimension
- Legal entity for elimination
- Legal entity for consolidation

Answer Area

Entity

- CompanyA
- OperationsC

Configuration

- Configuration
- Configuration

Correct Answer:

Configurations

Financial dimension
Legal entity for consolidation

Answer Area

Entity

CompanyA
OperationsC

Configuration

Legal entity
Legal entity for elimination

Box 1: Legal entity

Box 2: Legal entity for elimination

Elimination transactions are required when a parent legal entity does business with one or more subsidiary legal entities and uses consolidated financial reporting. Consolidated financial statements must include only transactions that occur

between the consolidated organization and other entities outside that organizations. Therefore, transactions between legal entities that are part of the same organization must be removed, or eliminated, from the general ledger, so they don't

appear on financial reports. There are multiple ways to report about eliminations:

An elimination rule can be created and processed in a consolidation or elimination company.

Financial reporting can be used to show the eliminations accounts and dimensions on a specific row or column.

A separate legal entity can be used to post manual transaction entries to track eliminations.

QUESTION 6

HOTSPOT

You need to recommend solutions to meet the CIO's requirements (or the customers and the roadmap).

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Location
Structure customers for the roadmap.	<ul style="list-style-type: none"> Data management framework Azure Data Lake Storage Gen2 Azure Data Lake Storage Gen1 Microsoft Power Platform Data management framework
Match old customer IDs to new IDs.	<ul style="list-style-type: none"> Common Data Model folder Common Data Model folder Data management framework Microsoft Power Platform

Correct Answer:

Requirement	Location
Structure customers for the roadmap.	<ul style="list-style-type: none"> Data management framework Azure Data Lake Storage Gen2 Azure Data Lake Storage Gen1 Microsoft Power Platform Data management framework
Match old customer IDs to new IDs.	<ul style="list-style-type: none"> Common Data Model folder Common Data Model folder Data management framework Microsoft Power Platform

Structure customers for the roadmap --- Data management framework Match old customer IDs to new IDs --- Common Data Model folder

QUESTION 7

A client has a third-party warehouse management system.

Data from the system must be integrated with Dynamics 365 Finance in near real-time. You need to determine an integration solution.

Which two solutions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. OData
- B. Batch data API processed daily
- C. Data management
- D. Business events

Correct Answer: AD

QUESTION 8

DRAG DROP

You need to determine which system functionality meets the business requirement.

What should you recommend? To answer, drag the appropriate functionalities to the correct requirements.

Each functionality may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Select and Place:

Workflow	Approve purchase requisitions over \$50.	Functionality
Purchasing policy	Review offsite travel expenses.	Functionality
Audit policy	Enforce vendor invoice compliance.	Functionality

Correct Answer:

	Approve purchase requisitions over \$50.	Workflow
	Review offsite travel expenses.	Purchasing policy
	Enforce vendor invoice compliance.	Audit policy

QUESTION 9

HOTSPOT

A mining company is upgrading their system to Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

You need to determine which functionality of the Dynamics 365 suite meets each requirement.

Which functionality should you implement for each requirement? To answer, select the appropriate options from the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement

Functionality

Track maintenance on mining machines and equipment.

	▼
Asset Management	
Fixed Assets	
Field Service	

Capture costs for each of the mine locations for capitalization opportunities.

	▼
Project Management and Accounting	
Fixed Assets	
Inventory dimension site	

Correct Answer:

Requirement

Functionality

Track maintenance on mining machines and equipment.

	▼
Asset Management	
Fixed Assets	
Field Service	

Capture costs for each of the mine locations for capitalization opportunities.

	▼
Project Management and Accounting	
Fixed Assets	
Inventory dimension site	

QUESTION 10

HOTSPOT

A company uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

The company plans to continuously apply upgrades.

You need to determine which functions meet the requirements.

Which function meets each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Function			
Enable click-by-click documentation of testing scenarios.	<div data-bbox="895 1055 1469 1099">▼</div> <table border="1"><tr><td data-bbox="895 1099 1469 1140">Task recorder</td></tr><tr><td data-bbox="895 1140 1469 1180">Regression suite automation tool (RSAT)</td></tr><tr><td data-bbox="895 1180 1469 1218">Business process modeler</td></tr></table>	Task recorder	Regression suite automation tool (RSAT)	Business process modeler

QUESTION 11

HOTSPOT

A company uses Dynamics 365 Finance.

The company wants to understand how version updates are handled.

You need to explain the version update and pause policy.

What should you conclude? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

What is the minimum number of required updates each year?

One
Two
Three
Four

How many consecutive updates can you pause before an update is required?

One
Two
Three
Four

Correct Answer:

What is the minimum number of required updates each year?

One
Two
Three
Four

How many consecutive updates can you pause before an update is required?

One
Two
Three
Four

Box 1: Two

Customers will be able to take up to 7 service updates per year and are required to take a minimum of 2 service updates per year.

Box 2: Three

Customers can choose to pause up to 3 consecutive updates at a time. Pausing a service update can apply to the designated user acceptance testing (UAT) sandbox, production, or both environments. After the pause window has ended and

if the customer has not self- updated to a supported service update, Microsoft will auto-apply the latest update based on

the configuration selection made available in Lifecycle Services (LCS).

QUESTION 12

A company uses Dynamics 365 Supply Chain Management and has two legal entities that distribute the same items. One of the legal entities uses advanced warehouse management.

New items that are created must meet the business needs of both companies and allow for consolidated analytics.

You need to recommend a master data management strategy to standardize the item master and meet the business requirements.

What should you recommend?

- A. Create the product record and release to each company where setup variations are completed.
- B. Use Common Data Management to create the item templates for both legal entities.
- C. Create an item in each company with different item numbers.
- D. Use an advanced warehouse setup for the product and release to both companies.
- E. Create an item in each company with the same item number.

Correct Answer: B
