Vendor:Network Appliance

Exam Code:NS0-102

Exam Name:NetApp(ASAP) Accredited Storage
Architect Professional

Version:Demo

QUESTION 1

Which three statements are true about NetApp protocols interoperability? (Choose three.)

- A. A file can be simultaneously accessed by NFS and CIFS.
- B. Aqtree must be Mixed Mode for concurrent NFS and CIFS access.
- C. A LUN can be accessed by either iSCSI or FCP.
- D. UNIX users are mapped to Windows users.
- E. Onetoone mapping exists between NFSstyle and CIFSstyle file permissions.

Correct Answer: ACD

QUESTION 2

Which two products allow for near synchronous replication at the volume or LUN level? (Choose two.)

- A. SyncMirror
- B. SnapMirror
- C. SnapVault
- D. ReplicatorX

Correct Answer: BD

QUESTION 3

In which three technical application markets does NetApp have a strong presence and value proposition? (Choose three.)

- A. oil and gas
- B. software development
- C. electronic design
- D. streaming media
- E. content filtering

Correct Answer: ABC

QUESTION 4

What happens to the SnapMirror function in synchronous mode when the mirror fails to complete in the specified parameters?

- A. The SnapMirror function stops.
- B. The SnapMirror function becomes asynchronous.
- C. The SnapMirror function drops the current blocks and continues.
- D. The SnapMirror function switches to vaulting mode.

Correct Answer: B

QUESTION 5

Which two NetApp replication products support heterogeneous file service environments? (Choose two.)

- A. Virtual File Manager
- B. Open SystemsSnapVault
- C. SyncMirror
- D. SnapMirror

Correct Answer: AB

QUESTION 6

From which Web site can partners access customerready PowerPoint presentations and demonstrations?

- A. PartnerCenter
- B. PartnerEdge
- C. NOWToolChest
- D. CustomerEdge

Correct Answer: A

QUESTION 7

ReplicatorXis a _____ disaster recovery solution based on _____ replication technology.

- A. heterogeneous asynchronous
- B. heterogeneous synchronous
- C. homogeneous asynchronous

D. homogeneous synchronous

Correct Answer: A

QUESTION 8

What is a function of NetApp FlexClone technology?

- A. It allows copies of database data sets with no additional space usage.
- B. It shrinks volumes and LUNs.
- C. It compresses databases.
- D. It validates every block written by the database to the storage.

Correct Answer: A

QUESTION 9

Which capabilities does NetApp ONTAP GX provide to achieve high performance for render and animation server farms?

- A. NWay Clustering and Global File System
- B. Stretch FabricMetroCluster and WAFL
- C. Clustering withSnapMirror Sync
- D. MetroCluster and RAIDDP

Correct Answer: A

QUESTION 10

Snapshot schedules can be defined within Data ONTAP for which three time intervals? (Choose three.)

- A. hour
- B. day
- C. week
- D. month
- E. minute

Correct Answer: ABC

QUESTION 11

Which two statements are true about Symantec NetBackup integration with SnapVault? (Choose two.)

- A. Unpacking and deduplication of the tar stream is done by Data ONTAP.
- B. NetBackup sends only changed blocks to the SnapVault target.
- C. Data ONTAP allows NFS and CIFS access to the backup.
- D. Policy Schedule is controlled by Data ONTAP.

Correct Answer: AC

QUESTION 12

What is the business value of FlexCache in a technical application environment? (Choose two.)

- A. It increases overall performance while keeping administration costs to a minimum.
- B. It provides multiple writable copies of data to geographically distributed locations.
- C. It provides a method for prioritizing quality of service over the WAN.
- D. It provides a method for prioritizing memory usage on the storage controller.

Correct Answer: AB
