Version:Demo

QUESTION 1

On an Account Management form, you need to add a link control for changing the mailing address. When users click the link, the application runs a ChangeAddress flow in a modal dialog. How do you implement this requirement?

- A. Configure the edit mode of the link to display the flow UI in a modal dialog.
- B. Configure an action set on the link to launch the flow in a modal dialog.
- C. Configure a visible when condition on the link to display the flow in a modal dialog.
- D. Configure the flow to render its UI in a modal dialog instead of a section.

Correct Answer: B

QUESTION 2

You have an approval process assignment to a loan request process. The requirement states that a request can be routed to one or more managers for their approval. The hierarchy of approvals depends upon the total dollar amount of the request. For example, Cost Center Managers approve requests that are less than USD25,000. A request of greater than or equal to USD25,000 requires the approval of the Cost Center Manager, corporate Vice President, and Vice President of Finance.

How would you configure the routing for the approval process assignment?

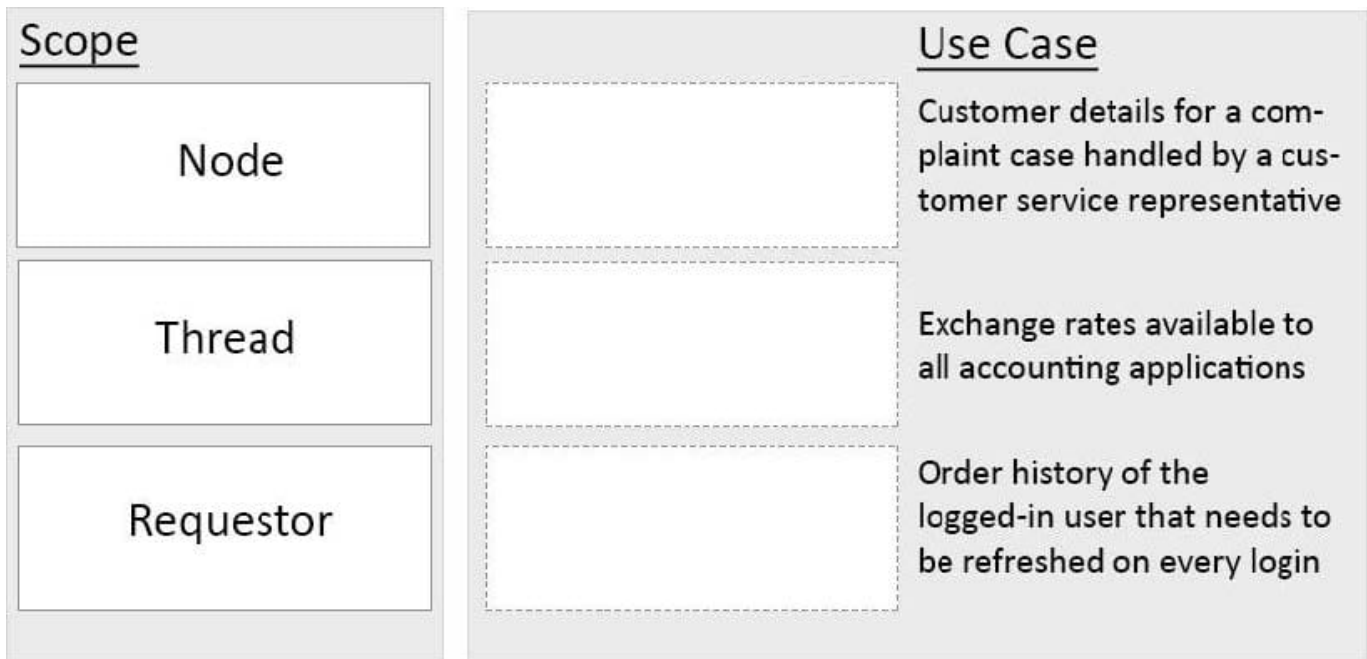

- A. Configure a single level approval flow type and route to a workbasket accessible by the approvers.
- B. Configure a cascading approval flow type based on an authority matrix.
- C. Configure a single level approval flow type based on an authority matrix.
- D. Configure a cascading approval flow type based on the reporting structure of the current user.

Correct Answer: B

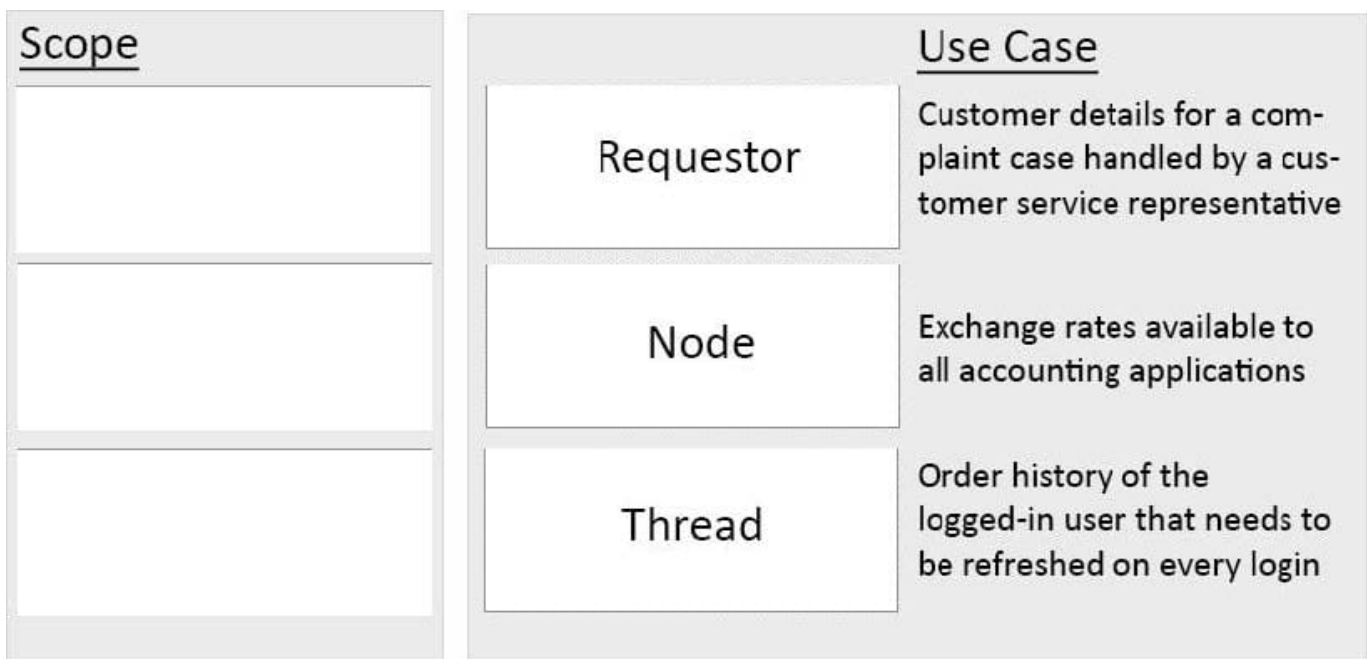

QUESTION 3

Match each data page scope to its use case.

Select and Place:

Correct Answer:

QUESTION 4

During a playback, you place a flow in draft mode to address which limitation?

- A. To prevent additional shapes from being added to the flow.
- B. To avoid errors due to references to rules that do not yet exist.

C. To save an incomplete flow.

D. To allow users to choose decision outcomes if a decision rule is not yet available.

Correct Answer: B

QUESTION 5

A manager requests a report that contains the following columns: Create Date, Case ID, Create Operator, and Work Status. You must sort the cases so the case with the most recent create date appears at the top of the list and descends in order.

How would you design the report definition to support this requirement?

A. Select Count in the Summarize column for Create Date.

B. Make that Create Date the first column in the report.

C. Select Highest to Lowest sort type for Create Date.

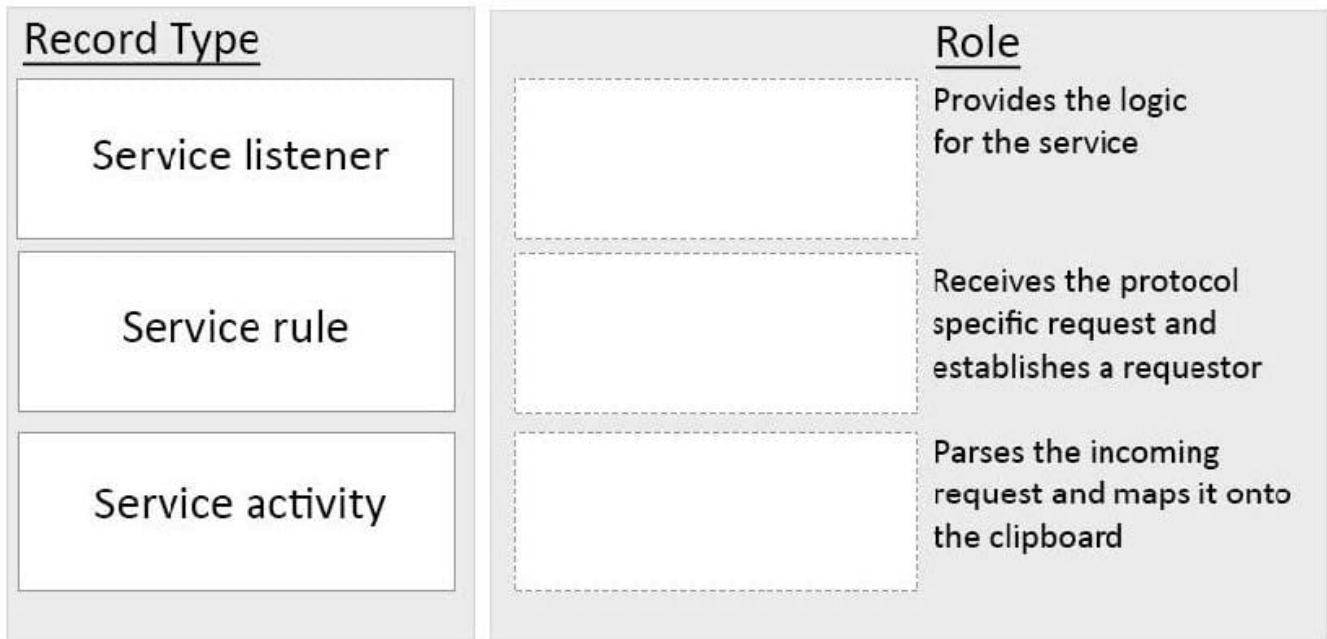

D. Add a filter condition where Create Date is greater than the current date.

Correct Answer: C

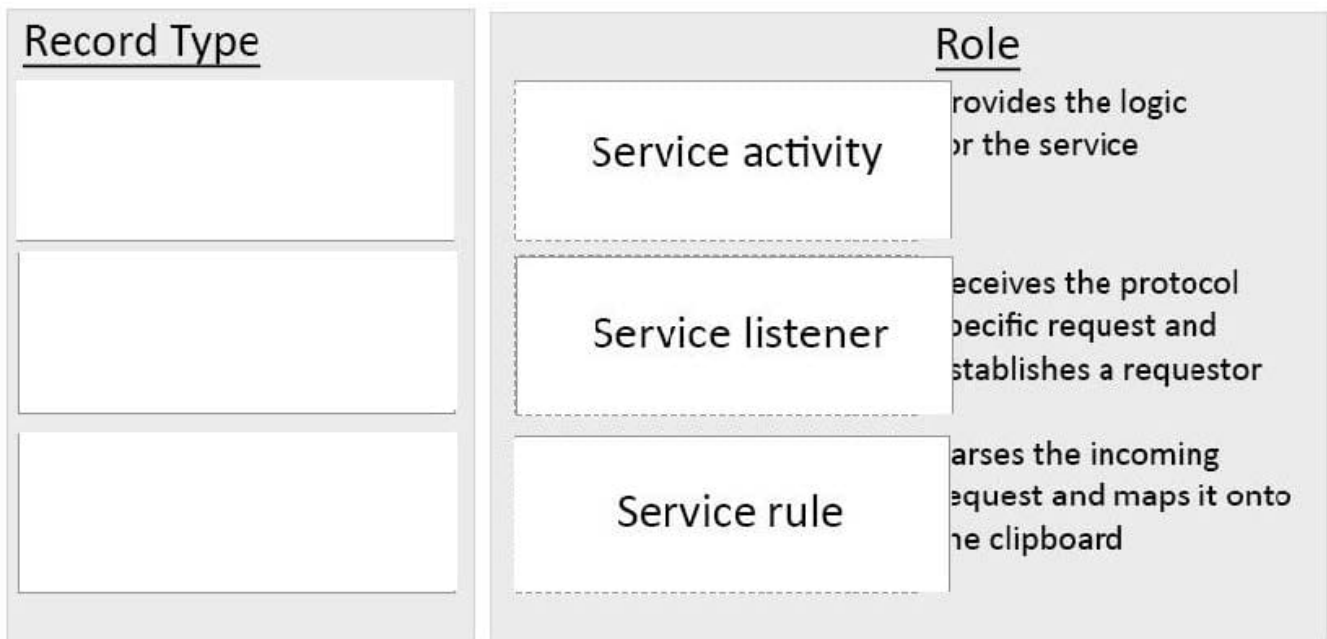

QUESTION 6

Match each service record type to the correct role in processing an incoming request.

Select and Place:

Correct Answer:

QUESTION 7
